Full analysis

Overview

Fundable is a startup fundraising platform within the Startups.com ecosystem, presenting self-managed fundraising tools, investor outreach support, accelerator memberships, and profiles of funded companies for startups seeking capital.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavior, and external reputation signals. The homepage presents a coherent startup-fundraising purpose, identifies the Startups.com relationship, and shows no phishing, impersonation, malicious-content, or blacklist indicators. Its long-established domain and stable technical operation further support an established identity.

- Domain registered 2004-08-09 and approximately 21.99 years old; registrar: GoDaddy.com, LLC.
- The homepage identifies Fundable as a startup fundraising platform and displays funded-company profiles.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

Fundable describes a SaaS-style fundraising and accelerator business rather than a securities intermediary. Its site expressly disclaims broker-dealer, investment-advisory, transaction-negotiation, and custody activities. No specific license or registration claim is presented in the supplied evidence; this is a limited disclosure point for regulatory verification, not evidence of misconduct.

- The homepage describes fundraising software, accelerator memberships, investor outreach, and accredited-investor targeting.
- The site's legal/business disclosures state that it does not broker securities, provide investment advice, negotiate transactions, or hold funds or securities.
- Hosted on AS14618 (AMAZON-AES — Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M01, DV validation, valid to 2026-12-29.

What to Verify Next

For regulated use or material commitments, confirm the platform's precise service scope and any applicable licensing or registration requirements with the relevant jurisdictional registry. Independently confirm official support and contact channels through the Startups.com ecosystem before executing consequential business actions.

- The homepage links Fundable’s service presentation to the Startups.com ecosystem.
- Legal and service disclosures define the platform as a fundraising-support service rather than a securities custodian or adviser.

Summary Verdict

Fundable presents as a legitimate, established, and trustworthy website with a coherent business identity and no observed impersonation or malicious-risk contradictions. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

The site is served through Amazon hosting infrastructure with a valid mainstream-issued DV TLS certificate. These controls provide a positive protective signal for transport security and infrastructure stability, while remaining mitigating rather than conclusive evidence of legitimacy.

Closing Assessment

Standard platform use is appropriate; any investment, fundraising, or contractual decision should remain subject to the organization’s normal commercial and regulatory diligence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundable.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
