Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an institutional portal operated by Fundação FAFIPA for administering Brazilian public examinations and simplified selection processes, presenting candidate access, application periods, fee-exemption windows, examination schedules, official notices, support services, and procurement enquiries under a disclosed organizational identity.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial propositions, or malicious redirections were observed. The long-established domain, consistent institutional identity, stable examination-focused content, and clean external threat reputation collectively support the conclusion that this is the legitimate Fundação FAFIPA portal.

- The homepage identifies the operator as Fundação FAFIPA and provides a candidate area, official-act resources, examination listings, an FAQ, and institutional service channels.
- The homepage publishes detailed notices for named municipal recruitment processes, including edital references and specific registration, exemption-request, and examination dates.
- The domain was registered in 2013 and is approximately 12.75 years old; its registration record identifies Fundação de Apoio a FAFIPA as the owner.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no threat-signature matches, and no reported abuse associated with the evaluated infrastructure.

Regulatory Verification Notes

The site discloses an institutional identity, Brazilian corporate identifier, physical address, telephone contacts, and institutional email channels. Its stated activity is public-recruitment and examination administration rather than a regulated investment, brokerage, or deposit-taking service; accordingly, no financial-services licence would ordinarily be expected from the presented business model. The supplied evidence does not establish whether particular examination-management engagements require additional accreditation or procurement authorization, but this is a limited engagement-level verification matter rather than a legitimacy concern.

- The homepage title discloses CNPJ 05.566.804/0001-76, while the captured institutional content includes a physical address and telephone contact details.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid to 2026-09-06.
- The site is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).

- The official-content navigation includes “Atos Oficiais” and a quotation-request function, consistent with examination administration and institutional contracting.

What to Verify Next

Before enrolling in a particular selection process or making a related payment, the applicable edital should be matched to the commissioning municipality or public institution through that body’s independent official channel. Payment instructions, deadlines, eligibility rules, and the authorized candidate workflow should be checked against the relevant notice, while institutional procurement teams should validate engagement authority through their normal contracting records.

- Individual homepage listings identify the commissioning public body, process type, edital number, and application timetable needed for independent cross-checking.
- The candidate-access area provides account entry and password-recovery functions for registered applicants.
- The site separates open, ongoing, and homologated competitions, providing process-status context for validating current instructions.

Summary Verdict

The website presents as a legitimate, established, and trustworthy institutional service portal. Its coherent identity, substantive public-examination content, mature domain provenance, clean threat reputation, and stable observed behavior converge without contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer across four observed edge addresses, which reduces direct exposure of the origin server and supplies a mainstream protective control. This infrastructure is a mitigating security measure rather than independent proof of organizational legitimacy.

Closing Assessment

Prospective candidates and institutional users may use the portal normally, applying routine process-specific checks against the relevant official notice before completing an application or payment.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fundacaofafipa.org.br.

- The request stayed on fundacaofafipa.org.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-11-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundacaofafipa.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
