

Is fundacaolasalle.org.br legit? TrustSniffer's high-trust assessment: 100/100

fundacaolasalle.org.br

Verdict

100

OUT OF 100

HIGH TRUST

fundacaolasalle.org.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking institutional homepage for Fundação La Salle in Canoas, Brazil. It describes public recruitment examinations, social and technical programs, educational assessment, news, reports, and vacancies, and provides a CNPJ, street address, telephone number, operating hours, and social-media channels.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional online presence of Fundação La Salle, a Brazilian nonprofit foundation offering public recruitment administration, educational assessment, technical projects, social programs, employment information, and related institutional services funded through partnerships, contracted work, and its own resources.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam signals were observed. The long-established domain is registered to Fundação La Salle, while the homepage presents a matching institutional identity supported by a Brazilian corporate identifier, physical address, telephone contact, operating hours, and established social-media channels. Interactive testing found no credential-harvesting form, concealed form, deceptive redirect, cloaking, wallet interaction, clipboard manipulation, or suspicious script behavior. External reputation checks were likewise clean across all evaluated sources.

- The domain-registration record identifies Fundação La Salle as the owner and shows: Registered 2007 (~19.28 years old), with registration valid through 2030.
- The homepage identifies the institution consistently and publishes a CNPJ, street address, telephone number, operating hours, and links to Facebook, YouTube, and Instagram.
- The homepage contains one newsletter-subscription form; it requests no sensitive credentials and has no untrusted submission destination.
- Behavioral examination completed two successful interaction runs without hidden forms, external password submissions, cloaking, suspicious inline scripts, or brand-impersonation indicators.

Regulatory Verification Notes

The site represents an institutional foundation rather than a financial intermediary or investment platform, and it makes no financial-services licensing claim requiring corroboration in the supplied evidence. Its navigation provides organization, history, areas of activity, salary-equality transparency, reports, and statutory-program material, giving visitors substantive governance and operational context. The absence of a match in the broker-intelligence dataset has no adverse significance for this non-broker business model.

- The institutional pages offer sections titled “Who We Are,” “Organization,” “History,” “Areas of Activity,” and “Transparency and Salary Equality.”
- The homepage provides access to an income report for 2025 and content concerning programs conducted under Brazilian Law No. 13.019/2014.
- No broker profile or adverse broker-reputation association was identified for the institution.

- The site's transport encryption uses a WE1-issued DV TLS certificate, valid to 2026-10-20.

What to Verify Next

Routine institutional due diligence may confirm the published CNPJ and physical contact details through authoritative Brazilian records, validate any specific recruitment notice against the issuing public authority, and confirm payment instructions before remitting examination fees or purchasing services. These are proportionate transaction controls rather than responses to detected fraud.

- The homepage provides the legal and contact particulars needed for an independent registry comparison.
- The recruitment area includes a candidate portal, public-examination materials, and a facility for issuing a duplicate payment slip.
- The site separates recruitment, social-program, technical-project, and educational-assessment functions into distinct service areas, allowing a proposed engagement to be checked against the relevant institutional channel.

Summary Verdict

The website is a legitimate, established, and trustworthy institutional presence. Its consistent identity, mature operating profile, clean external reputation, substantive public-service content, and benign observed behavior support normal interaction, including account login and standard use.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, and all four observed addresses were Cloudflare edge nodes; no separate origin address was exposed during the assessment. This reduces direct infrastructure exposure and provides a meaningful security mitigation, although protective hosting is not independently proof of legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US); the observed IPv4 and IPv6 addresses were CDN edge infrastructure.
- DNS resolution succeeded, with four unique edge addresses and no origin-server candidate identified.

Closing Assessment

Prospective users may interact with the site normally, applying standard organizational due diligence when responding to recruitment notices, making payments, or entering into formal service arrangements.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fundacaolasalle.org.br.

- The request stayed on fundacaolasalle.org.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-04-25. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundacaolasalle.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
