

Is fundapps.co legit? TrustSniffer's high-trust assessment: 100/100

fundapps.co

Verdict

100

OUT OF 100

HIGH TRUST

fundapps.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 60%.

What this site appears to be

FundApps presents an established enterprise SaaS platform that automates compliance monitoring and regulatory reporting for asset managers, hedge funds, investment banks, and other financial institutions. The page highlights global regulatory coverage, client adoption, testimonials, case studies, B Corp certification, resources, and demo/contact calls to action.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

FundApps is an established enterprise SaaS platform that presents automated compliance monitoring, regulatory reporting, and related data services for asset managers, hedge funds, investment banks, pension funds, and other financial institutions.

Scam/Impersonation Risk

No phishing, impersonation, malware, or identity contradictions were observed. The homepage presents a coherent corporate SaaS proposition, with no investment or deposit solicitation, suspicious login workflow, or high-risk financial promotion. The site's historical continuity and clean external reputation support an established identity rather than a recently created or repurposed operation.

- Domain record: registered in 2010, approximately 15.88 years old.
- Web archive: 186 snapshots spanning 2011–2026, covering 16 years.
- Homepage analysis: no red flags, phishing indicators, hidden forms, wallet activity, or sensitive external forms detected.

Regulatory Verification Notes

The homepage describes specific enterprise solutions for shareholding disclosure, sensitive industries, position limits, sanctions, investment monitoring, poison pills, UCITS and AIFMD, Filing Manager, AIFMD Annex IV, Form PF, and data services. It also presents sector coverage, client references, testimonials, case studies, resources, and B Corp certification. The supplied content does not show a license number or separate regulatory authorization; for a software supplier, this is a transparency and procurement-verification matter rather than evidence of deception. Registration through Gandi SAS and the corporate identity presented as FundApps Limited provide additional administrative consistency.

- Hosting telemetry: served from AS209242, CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- TLS telemetry: certificate issued by WE1 at DV validation level, valid to 2026-09-14.
- Corporate homepage: describes compliance-monitoring and regulatory-reporting services for financial-sector clients.
- Registrar record: Gandi SAS; organization recorded as FundApps Limited.

What to Verify Next

Enterprise counterparties should confirm the contracting entity, applicable service terms, and any sector-specific compliance obligations through standard procurement and legal review. Where regulatory authorization is relevant to the engagement, the appropriate public registry should be checked independently. Official support and contact channels should also be confirmed through an independently sourced corporate route.

- About and legal materials: provide corporate, privacy, and organizational information.
- Homepage: directs prospective customers toward demonstrations, resources, and business contact.
- Client and case-study materials: provide the stated basis for evaluating service scope and implementation claims.

Summary Verdict

FundApps presents as a legitimate, established, and trustworthy enterprise software provider. The available evidence converges on a mature corporate identity with no observed contradiction or material abuse pattern, making normal interaction, including account login and standard use, appropriate.

Infrastructure Integrity

Cloudflare CDN and WAF protection are in place, with observed traffic served through edge addresses 199.60.103.2 and 199.60.103.254; the origin server was not observable. This reduces direct exposure of the origin infrastructure and is a mitigating security factor, not proof of legitimacy.

Closing Assessment

Standard account use and ordinary business engagement are appropriate, subject to the normal contractual, legal, and procurement checks expected for an enterprise software provider.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fundapps.co.

- The request stayed on fundapps.co. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-03.net, across 4 name servers. NOTED

- The registration is paid up to 2026-09-16. NOTED
- The earliest public archive of this site is from 2011-09-09. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundapps.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
