- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the institutional website of Fundação São Paulo (FUNDASP), presenting its governance, affiliated institutions such as PUC-SP and Assunção, educational and healthcare services, publications, transparency materials, social initiatives, and contact information.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or blacklist findings were observed. The site's content is consistent with an established institutional foundation: it publishes governance structures, institutional policies, financial statements, activity reports, public notices, social programs, and contact information rather than presenting a deceptive commercial or investment offer. Historical coverage supports continuity of the institutional identity.

- The homepage identifies Fundação São Paulo (FUNDASP) and links to governance, affiliated institutions, transparency, publications, and social initiatives.
- The domain was registered in 2010-09-08 and is approximately 15.91 years old.
- Archive records contain 137 snapshots across 17 tracked years, from 2010-09-09 through 2026-05-14.
- The page analysis found no phishing forms, hidden sensitive forms, wallet activity, cloaking, or brand-impersonation indicators.

Regulatory Verification Notes

The site presents an institutional foundation model supporting education, healthcare, culture, and social programs, not a direct regulated financial-service offering. Its legal and governance materials include a code of ethics, integrity program, anticorruption policy, information-security and data-protection sections, ethics channel, financial statements, and transparency publications. No specific third-party regulatory registration or licensing claim is established by the supplied evidence; this is a documentation point for the relevant institutional activity, not an indication of deception. The external reputational context is clean, while the available authority signal is moderate and explanatory only.

- The site's publications area includes activity reports, financial statements, normative acts, public notices, and transparency annexes.
- Governance pages identify administration, councils, executive leadership, policies, and an ombuds function.
- Hosting resolves to AS52703, Fundação São Paulo, Brazil.
- The site's TLS certificate is issued by R12, uses DV validation, and is valid until 2026-08-19.

What to Verify Next

For any formal engagement, confirm the foundation's current legal and institutional details through the relevant Brazilian public registry or an independently obtained institutional contact route, and match any proposed partnership, donation, or service arrangement against the site's published governance and transparency materials.

- The site provides dedicated contact, ombuds, ethics-channel, and data-protection areas.
- The site publishes current normative acts and institutional communications.
- No sensitive login or payment form was observed on the analyzed homepage.

Summary Verdict

The website has a high-trust posture and reads as a legitimate, established institutional foundation. Its identity, substantive organizational content, clean technical behavior, historical continuity, and absence of contradictory signals support normal interaction, including account login and standard use.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful layer of traffic filtering and exposure mitigation. Observed infrastructure includes AS13335 edge addresses alongside AS52703, Fundação São Paulo; the protective network should be treated as a mitigating control rather than independent proof of legitimacy.

Closing Assessment

Normal institutional use is appropriate, with engagement decisions aligned to the specific service, partnership, donation, or administrative purpose involved.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundasp.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
