Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Funds Explorer is a Brazilian Portuguese financial-information portal focused on real-estate investment funds, presenting market data, rankings, calculators, portfolio tools, news, analysis, and educational resources rather than direct custody or investment execution.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational purpose, with no evidence of phishing, brand impersonation, credential harvesting, deceptive guarantees, or malicious behavior. Its established operating history and clean external reputation materially support the conclusion that the site is genuine and appropriate for normal interaction.

- The homepage was classified as an informational financial portal with no detected red flags or impersonation indicators.
- Behavioral inspection found no hidden forms, external password forms, wallet activity, clipboard hijacking, or cloaking.
- The domain was registered in 2016 and is approximately 10.22 years old.
- Historical records contain 182 snapshots spanning 2016–2026 across 11 tracked years.

Regulatory Verification Notes

The site clearly frames itself as a research and educational service covering FIIs, Fiagros, infrastructure funds, rankings, distributions, offerings, calculators, portfolio tools, news, newsletters, and subscriber features. Its legal and privacy pages are present, and it expressly states that the content is not investment advice. No regulatory license or registration number is claimed in the supplied site content; this is a transparency point for scope verification, not evidence of deceptive conduct. The available third-party context contains no broker-profile match.

- The homepage and legal pages identify informational content, subscriber functionality, privacy terms, and an investment disclaimer.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid through 2026-10-02.
- The observed transport layer was valid and associated with a known certificate issuer.

What to Verify Next

For any service that extends beyond research, confirm the applicable Brazilian regulatory registration and the precise scope of any paid or personalized offering through the relevant official registry. Confirm official support and contact channels through an independent source before resolving account or payment issues.

- The site's disclaimer provides a defined basis for distinguishing information from regulated investment advice.
- The presence of account, subscriber, and paid-content features makes service-scope confirmation the relevant next verification step.

Summary Verdict

Funds Explorer presents a legitimate, established, high-trust posture. The evidence converges on a coherent informational business model, sustained historical presence, clean reputation, and no observed identity or abuse contradiction.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with all observed addresses operating as edge servers and no origin candidate identified. This materially reduces direct origin exposure and is a mitigating infrastructure control, while remaining separate from proof of business legitimacy.

- Served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Six observed IP addresses were CDN edges; likely origin IP count was 0.
- Cloudflare was the detected CDN provider, with ARIN listed as the registry.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; regulatory-scope confirmation is the proportionate follow-up for any service extending beyond general financial information.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fundsexplorer.com.br.

- The request stayed on fundsexplorer.com.br. It was not redirected to another domain. CLEAR

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-05-16. CLEAR
- The earliest public archive of this site is from 2016-07-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fundsexplorer.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
