

Is funnymap.net safe? TrustSniffer's low-trust assessment: 40/100

funnymap.net

Verdict

40

OUT OF 100

LOW TRUST

funnymap.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-18 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking project page for 'Funny Map' — a free Fabric mod that provides dungeon mapping, secret tracking, score calculation, and related utilities for Hypixel SkyBlock. Page contains features, install steps, commands, downloads, FAQ and legal notice. No payment solicitations or credential collection detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://funnymap.net/

What funnymap.net served when TrustSniffer captured it on 2026-09-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents “Funny Map,” a free Fabric modification for Minecraft Hypixel SkyBlock that provides dungeon mapping, secret tracking, score calculation, star-mob detection, installation guidance, downloads, commands, an FAQ, and a legal notice; its apparent business model is non-commercial software distribution rather than payment or credential collection.

Scam/Impersonation Risk

The site’s page content is consistent with a game-mod download project and does not show payment solicitation, login forms, credential collection, or detected brand impersonation. However, this benign presentation is outweighed by a material external contradiction: the domain was recorded as blacklisted, with multiple malicious detections and an additional suspicious detection. The available evidence therefore supports a **high-risk assessment for interaction**, particularly because a clean-looking download page can still distribute altered or unwanted software. No distinct conflicting legal identities were observed, but the blacklist finding remains decisive.

EVIDENCE

- The homepage describes Funny Map as a Fabric dungeon-map mod with downloads, installation instructions, commands, and an FAQ.
- The page analysis recorded no login form, sensitive form, credential collection, payment solicitation, or brand-impersonation indicator.
- External reputation checks recorded 2 malicious detections, 1 suspicious detection, and a confirmed blacklist hit.

Regulatory Verification Notes

This is presented as a free software project rather than a regulated financial service, so conventional financial licensing is not apparent from the supplied site content. The legal and FAQ material provides some project documentation, but the real-world operator remains unverified and the site does not state a licensing authority or registration number. That is a transparency and provenance gap, not independent proof of fraud. The available third-party broker dataset did not match the site, but that contextual result does not establish legitimacy or regulatory status.

EVIDENCE

- The homepage includes a legal notice and FAQ but does not identify a licensing authority or registration number.
- The domain was registered on 2026-08-07 and is approximately 0.12 years old; the registrar is Web Commerce Communications Limited dba WebNic.cc.
- The site uses a DV TLS certificate issued by YE1, valid until 2026-12-16T17:51:11+00:00.

What to Verify Next

Before any download or execution, an organization should independently confirm the project operator through an established external project repository or community channel, compare the offered release with a verifiable upstream release, and scan the downloaded artifact in an isolated environment. The operator's legal identity and any claimed project ownership should be confirmed through an independent route rather than relying solely on the site's own legal notice.

EVIDENCE

- The site offers downloadable releases identified for Fabric 26.3 and 26.2.
- The page provides installation steps and commands, creating a concrete software-supply-chain verification point.
- The site's operator identity is not independently verified in the available evidence.

Summary Verdict

The website has a **low-trust posture** because a professionally presented, apparently non-commercial project page is contradicted by confirmed external threat and blacklist signals. The available evidence does not establish that the site operator or download artifacts are trustworthy, and sensitive interaction should not be treated as routine.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct origin exposure but does not validate the operator or neutralize the external reputation findings. The observed edge address was 91.211.13.26 on AS203273, associated with NetCraftersOU - NetCrafters OU, EE; the origin server was not observable in this analysis.

EVIDENCE

- Served through Cloudflare CDN/WAF infrastructure.
- Observed edge IP: 91.211.13.26.
- Hosting ASN: AS203273; hosting provider: NetCraftersOU - NetCrafters OU, EE.
- Observed server country: UA.

Closing Assessment

The proportionate course is to treat the site and any supplied software as untrusted until independent project provenance and artifact integrity have been established; organizational environments should avoid routine execution or sensitive account interaction pending those checks.

Written analysis generated 2026-09-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of funnymap.net.

- The request stayed on funnymap.net. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- It is hosted on NetCraftersOU, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about funnymap.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
