

Is funnymap.org safe? TrustSniffer's low-trust assessment: 40/100

funnymap.org

Verdict

40

OUT OF 100

LOW TRUST

funnymap.org is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-24 by automated analysis. Classification confidence 55%.

What this site appears to be

A dedicated download and documentation page for 'Funny Map' — a free Fabric 1.21.11 Minecraft mod that provides dungeon mapping, secret tracking, star mob detection, score calculation, and related features. Includes installation steps, commands, FAQ, and a download link for the JAR. Declares no affiliation with Mojang or Hypixel.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://funnymap.org/

What funnymap.org served when TrustSniffer captured it on 2026-09-24. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

FunnyMap.org presents a dedicated download and documentation site for “Funny Map,” a free Fabric 1.21.11 Minecraft mod for Hypixel SkyBlock that provides dungeon mapping, secret tracking, score calculation, star-mob detection, installation guidance, commands, and a JAR download.

Scam/Impersonation Risk

The site carries a **high-risk interaction posture** because external intelligence recorded a confirmed blacklist hit, together with one malicious and three suspicious detections. This is a direct contradiction to the otherwise benign presentation of the homepage and materially outweighs the absence of visible payment requests, login forms, hidden sensitive forms, or detected brand impersonation. The site presents “Funny Map” as an unofficial Minecraft utility, expressly stating that it is not affiliated with Mojang or Hypixel; however, the identity of the real-world operator remains unverified. The downloadable JAR and instructions to place it in the Minecraft `mods` folder create an executable-content risk that warrants independent validation before execution. No suspicious contact-email anomaly was identified in the supplied evidence.

EVIDENCE

- The homepage advertises a free Fabric 1.21.11 dungeon overlay with room scanning, secret tracking, score calculation, and star-mob detection, and offers a JAR download.
- External reputation telemetry records a confirmed blacklist hit, one malicious detection, and three suspicious detections.
- The domain was registered in 2026 (~0.38 years old).
- The homepage states that the project is not affiliated with Mojang or Hypixel; behavioral inspection recorded no login form, hidden sensitive form, wallet interaction, or external form submission.

Regulatory Verification Notes

The site is a software-download project rather than a financial or regulated-service business, and no payment or monetization flow is presented. Its FAQ, legal, and privacy navigation provides some documentation structure, but the supplied page material does not independently establish a corporate operator, accountable legal entity, or licensing authority. This is a transparency and identity-verification gap, not by itself proof of fraud. The available evidence supports treating the site's legitimacy as unverified despite its clear technical documentation and stated non-affiliation.

EVIDENCE

- The homepage and documentation describe a free Minecraft mod and provide installation, command, and FAQ material without presenting a regulated service or payment flow.
- The site identifies the project as unaffiliated with Mojang and Hypixel.
- No licence authority or licence number is presented in the supplied legal or product material.
- The transport certificate is domain-validated, issued by WE1, and valid through 2026-11-09; this confirms encrypted transport but does not establish operator identity or regulatory status.

What to Verify Next

Before execution, the JAR should be obtained only through the site's documented download path and independently checked using a trusted malware-scanning workflow and a reproducible hash comparison if an authoritative project hash is available. The project's source provenance, maintainer identity, release history, and compatibility with the stated Fabric and Minecraft versions should be confirmed through an independently established channel. The official support and contact channels should also be confirmed through an independent route, and any claimed legal or licensing information should be checked against the relevant rights holder or registry where applicable.

EVIDENCE

- The homepage provides a direct JAR download and installation instructions requiring placement in the Minecraft `mods` folder.
- The documentation identifies Fabric 1.21.11 compatibility and supplies `/fmap` usage instructions.
- The site's legal, privacy, and FAQ areas provide potential locations for confirming maintainer and distribution details.
- The site states that it is not affiliated with Mojang or Hypixel, making independent confirmation of project provenance particularly important.

Summary Verdict

The overall posture is low trust with a substantial risk of harmful or inappropriate interaction. The site is technically coherent and informational in presentation, but the confirmed external reputation contradiction and unverified operator identity prevent it from being treated as an established or dependable destination for sensitive activity.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than directly exposed origin infrastructure. This provides a useful layer of network protection and can reduce direct origin exposure, but it is only a mitigating infrastructure characteristic and does not resolve the site's reputation or identity concerns.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Observed edge address: 104.21.84.234; four CDN edge addresses were identified and zero origin candidates were observed.
- TLS certificate issued by WE1 (DV), valid to 2026-11-09.

Closing Assessment

Prospective users should restrict activity to passive review until the project's provenance and downloaded-file safety have been independently established, and should not provide credentials or conduct financial activity through the site.

Written analysis generated 2026-09-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of funnymap.org.

- The request stayed on funnymap.org. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-06. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about funnymap.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
