Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional portal of the Federal University of Petroleum Resources, Effurun, a Nigerian public university presenting admissions information, academic programmes, research resources, governance material, institutional news, policies, and student and staff services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, blacklist findings, or deceptive financial mechanics were observed. The domain's long registration history, extensive archival record, clean threat-reputation results, and consistent public-university identity strongly support authenticity. Observed browser activity included an admissions popup and limited inline scripting, but no cloaking, hidden forms, external data submission, credential harvesting, or wallet-related behavior; these characteristics do not indicate an abusive workflow.

- The domain's registration record shows it was registered in 2009 and is approximately 17.23 years old; the current registration expires on 31 July 2030.
- The web archive contains 987 snapshots spanning 19 January 2010 to 4 February 2026, representing 17 years of tracked history, with no established evidence of suspicious repurposing.
- The homepage identifies the institution as the Federal University of Petroleum Resources, Effurun, and places it in Effurun, Delta State, Nigeria.
- Technical reputation checks recorded zero malicious and zero suspicious detections, no search-browsing threat finding, and no reported abuse against the assessed host.

Regulatory Verification Notes

The homepage provides a coherent institutional identity through named governance structures, principal officers, a governing council, policies, public-data disclosure, and physical and telephone contact information. Its use of Nigeria's restricted academic namespace is consistent with the stated university function. No sector-specific licence or registration number is established in the supplied page content; for a public university, this is a disclosure-verification matter rather than evidence of fraud. No matching adverse broker profile was identified, although broker-oriented intelligence is not material proof of academic authorization.

- The homepage navigation includes institutional history, administration, principal officers, strategic officers, governing-council membership, policies, and data-disclosure resources.
- The site uses the academic restricted suffix `edu.ng`, consistent with its presented Nigerian higher-education role.

- The domain is registered through Upperlink Limited.
- The site's transport encryption uses a YR1-issued domain-validated certificate, valid until 27 September 2026.

What to Verify Next

Before submitting an application or making a material payment, the relevant programme, intake notice, fee schedule, and destination account should be matched against the university's published admissions material. Any third party claiming to act for the institution should be independently confirmed through the institutional telephone or contact channels displayed on the site. Where formal institutional due diligence is required, the university's current legal establishment and programme approvals should be checked with the applicable Nigerian education authorities.

- The homepage provides direct routes to admissions notices, online applications, student login, staff services, and institutional contact information.
- The homepage publishes current academic and administrative content across undergraduate, postgraduate, subdegree, and professional-certification functions.
- No sensitive form or form posting to an untrusted destination was detected on the assessed homepage.
- The observed page generated no external XHR requests or external form submissions during two successful interaction runs.

Summary Verdict

The site is a legitimate, established, and trustworthy institutional website. Its identity, historical provenance, page substance, technical reputation, and observed behavior converge without material contradiction, supporting a high-confidence assessment suitable for normal institutional engagement.

Infrastructure Integrity

The site resolves directly to a likely origin address hosted by Enix Ltd in Great Britain, without a detected CDN or WAF layer. Direct origin exposure provides less edge-layer shielding than a CDN-backed deployment, but the assessed infrastructure was stable and showed no associated abuse pattern; this is a hosting characteristic, not a legitimacy concern.

- The site is served from AS52148 by ENIXLTD – Enix Ltd, GB, at the resolved address 91.204.209.8.
- Infrastructure analysis identified one likely origin address, no edge addresses, and no detected CDN.
- The hosting infrastructure resolved successfully and was registered within the RIPE NCC region.

Closing Assessment

Normal interaction, including account login, application-related activity, and standard use of university services, is appropriate; ordinary care should be applied when responding to unsolicited third-party approaches or material payment requests.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fupre.edu.ng.

- The request stayed on fupre.edu.ng. It was not redirected to another domain. CLEAR
- Registration is published under Upperlink Limited. CLEAR
- DNS for this domain is served by hostns.io, across 2 name servers. NOTED
- The registration is paid up to 2030-07-31. CLEAR
- The earliest public archive of this site is from 2010-01-19. CLEAR
- It is hosted on ENIXLTD, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fupre.edu.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
