

Is fusionnet.in legit? TrustSniffer's high-trust assessment: 80/100

fusionnet.in

Verdict

80

OUT OF 100

HIGH TRUST

fusionnet.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Fusionnet commercial site for an Indian ISP offering residential and business internet plans, leased lines, managed services, and entertainment packages with pricing, contact details and office addresses.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Fusionnet is a commercial Indian internet-service provider serving residential and business customers in Noida and the wider NCR, presenting broadband subscriptions, dedicated connectivity, managed network services, entertainment packages, pricing, contact channels, and office information through its website.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-content, or blacklist indication. The homepage presents a coherent ISP business model rather than an anomalous or unrelated service, and external reputation checks recorded no malicious or suspicious detections. Historical continuity is also consistent with an established web presence. The operator's real-world identity is not independently verified, so the legitimacy assessment remains evidence-consistent rather than proven.

EVIDENCE

- The homepage identifies Fusionnet as an ISP for Noida/NCR and presents broadband, leased-line, and managed connectivity services; page analysis recorded no red flags or brand-impersonation indicators.
- The domain registration record shows creation on 2014-12-09 and an age of 11.68 years, with GoDaddy.com, LLC as registrar.
- Web-archive coverage records 170 snapshots from 2015-10-19 through 2026-04-12, spanning 12 years.
- External reputation checks recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `external\_blacklist: false`.

Regulatory Verification Notes

The website's content is consistent with a subscription-based telecommunications business. Its pages describe home broadband, internet leased lines, managed Wi-Fi, firewall solutions, cloud and SD-WAN services, Fusionnet TV, pricing, customer support, and office addresses. The reviewed content does not state a licensing authority or license number; this is a regulatory-transparency item to resolve independently, not evidence of deceptive conduct. The available third-party broker context produced no match and should not be treated as a licensing or regulatory determination.

EVIDENCE

- The homepage and service content describe recurring broadband and business-connectivity offerings, including installation and managed-service elements.
- The site is served from AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY.
- The site's transport encryption uses a DV TLS certificate issued by YE1, valid to 2026-11-02.
- The reviewed site content contains no stated license authority or license number.

What to Verify Next

Before credential or payment interactions, independently match the operating business name and service address against the relevant telecommunications or corporate registry, and confirm the applicable authorization for the service offered. Confirm cancellation, installation, outage, and refund terms in the customer agreement, and use payment methods providing appropriate dispute or payment-protection mechanisms. Contact details should be validated through an independent route rather than relying solely on a newly received message or payment instruction.

EVIDENCE

- The navigation exposes Contact Us, My Account, Investor, and Career areas, providing specific locations for identity and commercial-term checks.
- The homepage presents plan information and a Quick Pay route, making payment-flow and service-term validation directly relevant.
- The captured session contained no login form or sensitive form, so credential and payment controls were not fully assessed through interactive submission.

Summary Verdict

Available evidence supports a high-trust, low-risk posture for an established, apparently legitimate website. The site's coherent commercial purpose, sustained presence, clean external reputation, and consistent technical operation support normal browsing and ordinary service evaluation, while the absence of independent operator verification prevents identity from being treated as proven.

Infrastructure Integrity

The site resolves to a single direct hosting endpoint, with no CDN edge identified in the observed infrastructure. This provides a clear, conventional hosting posture, but hosting characteristics remain a technical mitigating signal rather than proof of the operator's identity or business standing.

EVIDENCE

- Infrastructure resolution recorded `unique\_ip\_count: 1`, `edge\_ip\_count: 0`, and `likely\_origin\_ip\_count: 1`.
- The resolved hosting country was recorded as BE, with RIPE NCC as the registry.

Closing Assessment

Proceed with ordinary business diligence before submitting credentials or payment information, giving particular attention to independently confirmed merchant identity, service terms, and payment protections.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fusionnet.in.

- The request stayed on fusionnet.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by fusionnet.in, across 2 name servers. NOTED
- The registration is paid up to 2026-12-09. NOTED
- The earliest public archive of this site is from 2015-10-19. CLEAR
- It is hosted on AS-HOSTINGER, from a server in BE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fusionnet.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
