- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Portuguese-language football information portal that presents match schedules, live and final scores, competition details, football news, and official television or streaming availability, supported by advertising and an optional ad-free Premium subscription.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, impersonation, or other scam-related conflicts were observed. The homepage's match listings, broadcaster references, news, mobile-app promotion, and Premium offering form a coherent sports-information service, while observed browser activity showed no hidden forms, credential diversion, wallet interaction, clipboard manipulation, cloaking, or suspicious scripts. The only notable browser feature was an autoplay or countdown video, which is consistent with media-site functionality rather than malicious behavior.

- The homepage displayed current fixtures, scores, kickoff times, competitions, named broadcasters, football news, and an ad-free Premium option.
- Homepage inspection found no sensitive or hidden forms, untrusted form destinations, brand impersonation, or cryptocurrency-related functionality.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no external blacklist finding, and no reported abuse.
- The domain was registered in 2018 and is approximately 7.87 years old; 185 archive snapshots span 2019–2026, representing 8 years of tracked history without evidence of suspicious repurposing.

Regulatory Verification Notes

The service presents an informational and subscription-supported sports-media model rather than regulated financial, investment, brokerage, or gambling activity. No licensing claim is made, and the supplied content provides no basis for treating sector-specific financial authorization as applicable. Support and policy references are visible, although the substantive terms of those pages are not included in the supplied page record. The registrant is identified as SINC NETWORK, and no conflicting legal-entity names were observed.

- The homepage characterizes the service through football schedules, viewing information, news, applications, advertising, and an optional Premium subscription.
- The homepage includes support and policy references and links to established social platforms.
- The domain registration record names SINC NETWORK as the owner and shows expiry on 2026-09-21.

- The site is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US); its DV TLS certificate was issued by WE1 and is valid until 2026-10-09.

What to Verify Next

For procurement or paid-subscription onboarding, the applicable Premium terms should be reviewed for pricing, renewal, cancellation, refund, and data-handling provisions. Mobile applications should be confirmed through official app-store listings and matched to the stated publisher, while outbound broadcaster destinations should be checked before initiating a subscription or payment. Official support channels may also be confirmed independently for enterprise escalation purposes.

- The homepage promotes an optional Premium plan whose detailed commercial terms are not present in the supplied homepage content.
- The homepage promotes mobile applications, creating a straightforward need to match app-store publisher identity during formal onboarding.
- Match listings direct visitors toward named television and streaming services, making destination validation relevant when leaving the site.
- The homepage provides navigation to support and policy material that can support contractual and privacy review.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence among its coherent business purpose, sustained historical presence, clean external reputation, stable observed behavior, and consistent identity signals. No contradictory risk indicators were identified, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF layer, with all observed addresses operating as edge nodes and no direct origin address exposed during the assessment. This configuration reduces direct server exposure and supports availability and traffic filtering, although protective infrastructure is a mitigating security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may use the service normally; organizations considering paid access should apply their routine subscription, privacy, and vendor-onboarding checks.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of futebolnatv.com.br.

- The request stayed on futebolnatv.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-21. NOTED
- The earliest public archive of this site is from 2019-01-22. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about futebolnatv.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
