

Is future-shop.jp legit? TrustSniffer's high-trust assessment: 100/100

future-shop.jp

Verdict

100

OUT OF 100

HIGH TRUST

future-shop.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Japanese corporate product page for futureshop, a subscription-based ecommerce platform providing storefront design, cart and payment functionality, marketing tools, subscriptions, loyalty features, omnichannel integration, analytics, support, and training. The page supplies starting prices, extensive feature descriptions, customer examples, third-party review references, contact details, company information, terms, privacy, and security-policy links.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents futureshop, an established Japanese business-to-business SaaS platform for building and operating ecommerce stores, offering storefront design, shopping-cart and payment capabilities, marketing, subscriptions, loyalty functions, omnichannel integration, analytics, training, and operational support through setup fees and recurring subscriptions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or malicious reputation signals were observed. The transparent subscription model—starting at ¥22,000 for setup and ¥27,000 per month, with no stated sales commission—is consistent with the detailed commercial offering. Its long operating history and stable business category provide strong provenance, while observed browser activity showed no credential-harvesting, wallet-draining, clipboard manipulation, cloaking, or concealed-form behavior.

- The homepage presents coherent pricing, service capabilities, customer examples, and routes for consultations, documentation requests, and trials.
- The domain was registered in 2003 and is approximately 22.6 years old; 993 archive snapshots span December 2003 to May 2026, covering 24 tracked years with no established suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-security warning, no external threat listing, and no reported abuse against the hosting address.
- The tested landing page contained no login form, sensitive form, hidden form, untrusted form destination, suspicious inline script, or detected brand impersonation.

Regulatory Verification Notes

The service is presented as ecommerce software rather than a financial intermediary, broker, investment platform, or regulated financial product. No financial-services license is claimed, and none is indicated as necessary for the described SaaS business model. Corporate-information, terms, privacy, and security-policy links are provided, supporting an orderly disclosure framework; the supplied page evidence identifies no conflicting legal-entity names. The absence of a match in the broker-intelligence dataset has no adverse significance for a non-broker software provider.

- The homepage identifies the offering as a SaaS ecommerce platform and links to company information, contractual terms, privacy information, and a security policy.
- The service description covers online-store construction and operational support, without cryptocurrency, investment, brokerage, or trading features.
- The site is served from AS23824 by FUTURE – Future Spirits Co., Ltd., Japan.

- Transport encryption uses a DV certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, valid until 17 August 2026.

What to Verify Next

Enterprise procurement should confirm the contracting entity and authorized signatory against the company-information and contract documentation, then review service levels, data-processing terms, payment-provider responsibilities, incident notification, and business-continuity commitments. Prospective customers should also validate implementation references relevant to their sector and confirm official commercial and support channels through the published corporate switchboard before executing an agreement.

- The homepage publishes a pre-contract telephone channel with weekday operating hours and separate routes for prospective and existing customers.
- The site offers customer case studies, company interviews, implementation lists, partner information, learning programs, and support resources suitable for procurement due diligence.
- The homepage links to named third-party review pages and identifies social presences on X, Facebook, and YouTube.
- The service offers consultation meetings, documentation requests, and a free trial, providing structured opportunities to validate functionality before contracting.

Summary Verdict

This is a legitimate, established, and trustworthy corporate website with strong convergence across commercial content, historical provenance, technical security, and external reputation. No evidence supplied indicates fraud, impersonation, phishing, or materially inconsistent identity claims. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single Japanese hosting address operated by Future Spirits rather than through a detected CDN or WAF, leaving the hosting endpoint visible but producing no confirmed infrastructure-risk condition. The valid TLS deployment protects data in transit; these technical controls support integrity but are not, independently, proof of business legitimacy.

Closing Assessment

Prospective users may proceed with normal evaluation, account access, and standard use, applying routine enterprise procurement and contractual due diligence before organizational deployment.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of future-shop.jp.

- The request stayed on future-shop.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2003-12-28. CLEAR
- It is hosted on FUTURE, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about future-shop.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
