Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

FutureSol is a marketing website for an Australian digital-services agency presenting web and mobile development, search-engine optimization, digital marketing, e-commerce, design, and related IT services, with the apparent business model of attracting client projects and quote requests.

Scam/Impersonation Risk

The site's visible content does not show login functionality, credential-harvesting forms, wallet-connect behavior, or other obvious on-page fraud mechanics. However, this benign presentation is outweighed by confirmed external reputation contradictions: the domain is blacklisted, and six evaluated detections classify it as malicious with one additional suspicious detection. The site should therefore be treated as unsuitable for credential submission, financial transactions, or other sensitive interaction. No separate brand-impersonation or conflicting legal-identity finding is established in the supplied evidence. Evidence:

- Homepage: Presents a conventional corporate-services layout with service descriptions, testimonials, contact details, and quote-oriented calls to action; no login or sensitive form was detected.
- Domain continuity: The domain was first observed on 2019-03-22 and last observed on 2025-11-28; reconciled domain age is 7.405886379192334 years.

- External reputation artifact: 6 malicious and 1 suspicious detections were recorded across 7 evaluated detections, with a confirmed blacklist status.

Regulatory Verification Notes

The available page content identifies the business as FutureSol and describes an agency model rather than a regulated financial service. No license claim, licensing authority, or license number is presented in the supplied material; this is a disclosure and verification gap, not independent proof of misconduct. The site's apparent operator identity remains likely rather than independently verified, so the on-site business presentation should not be treated as conclusive evidence of the contracting legal entity. Evidence:

- Homepage: Identifies "FutureSol" as an IT-services provider and presents business contact details in Kilburn, South Australia.
- Registration record: Registrar is Web Address Registration Pty Ltd; listed registrant is RAZA, SYED ALI.
- Hosting telemetry: Served from AS46606, Unified Layer, US.
- Transport security: TLS certificate issued by YR2 at DV validation level, valid to 2026-10-03T23:51:39+00:00.

What to Verify Next

Before any engagement, independently confirm the contracting entity, Australian business registration, physical presence, and authority of the person offering services. Obtain a written statement of work identifying the legal counterparty, payment terms, refund or remediation obligations, and ownership of delivered work. Confirm official contact channels through an independently sourced business record rather than relying solely on the website. Given the reputation findings, sensitive credentials and payment details should not be provided unless the external detections have been satisfactorily resolved through an independent security review. Evidence:

- The available site material supports a business-services engagement but does not provide a verified licensing or registration reference.
- The supplied identity assessment connects the site to a real-world person or brand only on a likely, not verified, basis.
- No broker-dataset match was identified, so that source provides no additional corroboration for the agency's identity or regulatory standing.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents a coherent professional-services offering and does not display obvious credential-harvesting behavior, the confirmed blacklist status and malicious external detections create a material barrier to trust for sensitive or commercial interaction.

Infrastructure Integrity

The site resolves directly to one identified origin address on AS46606, Unified Layer, US, with no CDN or WAF detected. Its DV TLS certificate provides transport encryption, but the hosting arrangement and certificate do not mitigate the confirmed reputation risk or establish legitimacy.

Closing Assessment

The appropriate institutional posture is to suspend sensitive engagement pending independent identity, business-registration, and security validation; any unavoidable review should remain limited to non-sensitive observation.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of futuresol.com.au.

- The request stayed on futuresol.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Web Address Registration Pty Ltd. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The earliest public archive of this site is from 2019-03-22. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about futuresol.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
