

Is futuretechsoftwares.com safe? TrustSniffer's low-trust assessment: 32/100

futuretechsoftwares.com

Verdict

32

OUT OF 100

LOW TRUST

futuretechsoftwares.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Default hosting provider placeholder page instructing the owner to upload site files and offering links for migrating sites and installing WordPress. No forms or monetization present on this page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://futuretechsoftwares.com/>

What futuretechsoftwares.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a Hostinger default landing page rather than an operational business site. It presents deployment guidance for uploading website files, migrating a site, and installing WordPress, indicating an undeployed hosting account with no active products, transactions, or visitor-facing business service.

Scam/Impersonation Risk

Contradictory external reputation evidence creates a material risk for sensitive interaction. The domain is recorded as blacklisted, and multiple external threat detections include malicious classifications. The captured homepage itself does not contain a login form, payment request, phishing form, or direct financial solicitation, so no active abuse mechanism was observed in the available page; however, that benign placeholder state does not resolve the external reputation contradiction. The domain's substantial historical continuity is a positive provenance signal, but it does not establish that the current undeployed page is operated by a verified real-world entity.

EVIDENCE

- External reputation telemetry records 2 malicious detections and 1 suspicious detection.
- The domain is listed in external blacklist telemetry, with the blacklist condition confirmed by 2 sources.
- Web-archive history records 275 snapshots from 2017-01-28 through 2026-03-03, spanning 10 tracked years.
- The archived domain history shows no detected suspicious repurposing or semantic category drift.

Regulatory Verification Notes

The captured page provides no company identity, legal-entity details, licensing information, or registration number. The real-world operator therefore remains unverified, and the site's governance and ownership disclosures are unclear. This is a regulatory and transparency gap rather than, by itself, proof of fraud; the decisive concern remains the separate external reputation contradiction. The technical environment does provide ordinary infrastructure signals, including a long-standing domain registration, a known registrar, and valid domain-validated transport encryption, but these do not constitute regulatory authorization or prove operator identity.

EVIDENCE

- Domain registration is recorded by HOSTINGER operations, UAB, with creation date 2019-10-22T19:55:34Z and age 6.83 years.
- The site is served from AS47583, identified as AS-HOSTINGER - Hostinger International Limited, CY, with hosting country DE.
- The transport certificate is issued by YE2 at DV validation level and is valid to 2026-11-08T22:12:04+00:00.
- The captured homepage contains deployment instructions only and no company, license, or registration disclosure.

What to Verify Next

Before any sensitive interaction, an institution should independently identify the operator through a relevant corporate registry and confirm any claimed authorization with the applicable financial, payments, software, or online-services regulator. Official contact channels should be confirmed through an independent offline or previously trusted route, and any account, credential, or payment workflow should be assessed only after the operator and service purpose are independently established. If those checks cannot be completed, interaction should remain limited to non-sensitive observation.

EVIDENCE

- The homepage is identified as a "Default page" and contains only 232 characters of visible text.
- No forms, sensitive forms, hidden forms, external password forms, wallet connections, or wallet-drainer activity were observed during testing.
- Two behavioral runs completed successfully, with a 200-status success ratio of 0.961.
- The page exposes no active commerce, monetization flow, or stated service terms in its captured state.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The available evidence is insufficient to treat the site as an established, verified service, and the external reputation contradiction outweighs the otherwise routine technical and historical signals. Login, credential submission, and financial activity are not supported by this assessment.

Infrastructure Integrity

The site resolves directly to Hostinger infrastructure on AS47583, with two IP addresses assessed as likely origin candidates and no CDN or WAF layer detected. This provides a technically identifiable hosting path but offers only limited mitigation and should not be interpreted as evidence of legitimacy.

Closing Assessment

Prospective users and institutions should avoid sensitive actions until the operator, service purpose, and any applicable authorization have been independently confirmed; absent that confirmation, use should remain non-sensitive and observational.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of futuretechsoftwares.com.

- The request stayed on futuretechsoftwares.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-22. NOTED
- The earliest public archive of this site is from 2017-01-28. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about futuretechsoftwares.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
