Regulatory Verification Notes

The site's apparent business activity is ordinary consumer ecommerce, covering cycling apparel, bikes, components, accessories, electronics, maintenance products, sports nutrition, promotions, and an associated app. No financial-services or other regulated-product claims are present in the supplied content. A licensing or corporate-registration disclosure is not established by the supplied evidence and should therefore be treated as a routine transparency point rather than an identity contradiction.

What to Verify Next

For institutional onboarding or higher-value purchasing, confirm the seller's legal entity, terms, returns process, privacy disclosures, and applicable consumer-protection information on the site's legal pages. Contact and

support channels should be confirmed through the site’s own customer-service navigation and an independent business record before contractual engagement.

- The homepage provides dedicated Contact and customer-service navigation.
- The storefront presents standard ecommerce functions, including product availability, promotions, and customer loyalty activity.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about futurumshop.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
