

Is fx.gl legit? TrustSniffer's high-trust assessment: 94/100

fx.gl

Verdict

94

OUT OF 100

HIGH TRUST

fx.gl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking game publisher site listing multiple game titles, careers, support and legal pages. Content emphasizes game descriptions and company information; no forms or financial promise content found in provided HTML.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

FX Games is an online and mobile game publisher and portal presenting titles including Galaxy Control, Dragon Lords, Warface GO, and Arena: Galaxy Control, alongside careers, support, contact, and legal resources. Its apparent business model is game distribution and related services, with likely monetization through in-app purchases and support offerings.

Scam/Impersonation Risk

No contradictions were observed across the available identity, content, behavioral, and reputation signals. The site presents a coherent game-publisher purpose, with no phishing indicators, malicious redirects, hidden forms, wallet activity, or financial-promise content identified in the supplied evidence. Normal interaction, including account login where applicable and standard use of the service, is appropriate.

EVIDENCE

- The homepage identifies FX Games and describes Galaxy Control, Dragon Lords, Warface GO, and Arena: Galaxy Control without financial-promotional claims.
- Behavioral testing recorded no external XHR or POST activity, no hidden forms, no password forms, no wallet-provider activity, and no clipboard-hijacking behavior.
- Reputation checks recorded 0 malicious and 0 suspicious detections; the domain is ranked 108915 and is within the top 1 million globally.
- The domain was registered on 2012-10-25 and is approximately 13.8 years old; the registrar is 1API GmbH.

Regulatory Verification Notes

The legal and support structure is consistent with a conventional game publisher: the site provides Terms, Privacy, Fraud Complaints, support, contact, and careers pages. No regulated financial service or licensing claim is identified in the supplied site content, so financial licensing is not a relevant basis for judging this publisher's legitimacy; any commercial, consumer, employment, or data-protection obligations should instead be assessed against the disclosures applicable to the specific interaction. No adverse broker-reputation match was identified.

EVIDENCE

- The legal page set includes Terms, Privacy, and Fraud Complaints pages.
- The TLS certificate is issued by YR1, uses DV validation, and is valid through 2026-10-25.
- Hosting is provided through AS24940, Hetzner Online GmbH, Germany.
- The domain registration currently expires on 2027-10-25.

What to Verify Next

Before a material commercial or employment engagement, the site's Terms and Privacy pages should be checked for the operator's applicable legal terms, data practices, refund provisions, and governing jurisdiction. Official game distribution listings should be used to corroborate product ownership and support channels, while recruitment or payment-related communications should be matched to the contact routes published on the site through an independent route.

EVIDENCE

- The Terms and Privacy pages provide the primary documents for reviewing contractual and data-handling conditions.
- The support and contact pages provide the site's stated routes for service and commercial communications.
- The careers page provides the relevant reference point for validating recruitment-related requests.

Summary Verdict

The website has a high-trust posture and is assessed as a legitimate, established game-publishing entity. The available evidence supports normal interaction, including account login and standard use, with no observed contradiction requiring elevated security treatment.

Infrastructure Integrity

Delivery is protected by Cloudflare CDN/WAF infrastructure, providing a meaningful mitigation against common edge-level abuse and exposure. All observed addresses were CDN edge servers, and no origin-server candidate was identified in the infrastructure analysis; this supports resilience and reduces direct origin exposure but is not, by itself, proof of legitimacy.

EVIDENCE

- Cloudflare was identified as the site's CDN/WAF provider.
- Five observed IP addresses were classified as CDN edge addresses, with 0 likely origin IPs.

Closing Assessment

Prospective users may proceed with ordinary site interaction and standard account or service activity, applying normal organizational controls to any consequential purchase, employment, or data-sharing decision.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fx.gl.

- The request stayed on fx.gl. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2027-10-25. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fx.gl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
