

Is fxempire.com legit? TrustSniffer's high-trust assessment: 100/100

fxempire.com

Verdict

100

OUT OF 100

HIGH TRUST

fxempire.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 65%.

What this site appears to be

FXEmpire is a financial-media homepage offering news, forecasts, live market information, education, broker and crypto-exchange reviews, and economic calendars. The page includes sponsored broker placements and affiliate disclosures, identifies its operating company and registered address, and prominently warns that CFDs and cryptocurrencies carry substantial loss risk.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

FXEmpire is an established financial-media and market-analysis website providing news, forecasts, live market data, educational material, economic calendars, and reviews of brokers, proprietary-trading firms, and cryptocurrency exchanges. Its business model combines advertising, subscriptions, sponsored placements, and compensation from linked financial-service partners.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or suspicious return promises were observed. The site's long historical footprint, substantial public usage, consistent financial-publishing purpose, and benign interactive behavior strongly support the conclusion that it is the authentic and legitimate FXEmpire service.

- Domain records show registration on 15 November 2010, approximately 15.72 years old, through Wild West Domains, LLC, with registration extending to 15 November 2028.
- The domain has 5,000 archive snapshots spanning 27 April 2004 to 7 December 2025, representing 22 years of tracked history; the historical review found no suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and no matching threat signatures.
- Public traffic data places the domain at rank 32,455, indicating an established global audience.

Regulatory Verification Notes

The homepage identifies an operating company and registered address, presents prominent warnings concerning CFD and cryptocurrency losses, and discloses sponsored and affiliate relationships. FXEmpire presents itself as a publisher and comparison service rather than as the broker or exchange executing the reviewed transactions. No license claim or regulatory authorization number was identified in the supplied page evidence; this is not a scam indicator for the stated publishing model, but visitors should distinguish FXEmpire's editorial or commercial assessments from the regulatory status of each promoted provider.

- The homepage describes financial news, forecasts, education, market data, economic calendars, and broker and exchange reviews while identifying its operating company and registered address.
- The homepage expressly discloses sponsored broker placements and compensation from linked brokers, exchanges, and other partners.

- The homepage displays risk warnings addressing the substantial potential for losses from CFDs and cryptocurrencies.
- The available third-party broker dataset contains no matched FXEmpire broker profile; this provides no independent licensing conclusion.

What to Verify Next

Before acting on a broker, exchange, or proprietary-trading-firm recommendation, the provider’s legal entity, authorization, permitted jurisdictions, custody arrangements, and current registry status should be checked independently. Commercial ranking methodology, sponsorship status, and applicable subscription or cancellation terms should also be reviewed. Browser permissions should be enabled only where required for the intended service, and outbound financial-service links should be checked for the expected destination before use.

- The homepage contains comparison and “best provider” guides covering brokers, trading platforms, proprietary-trading firms, staking services, leveraged-trading platforms, and no-KYC exchanges.
- Browser observations identified consent-based features for personalized advertising, precise geolocation, device characteristics, and notification offers.
- Interactive testing found no hidden forms, externally submitted password forms, wallet-provider interaction, clipboard hijacking, cloaking, or suspicious inline scripts.

Summary Verdict

FXEmpire is a legitimate, established, and trustworthy financial-information website. Its identity, historical provenance, public reach, page content, reputation, and observed behavior converge consistently, with no evidence of impersonation or malicious operation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is delivered through mainstream Amazon content-delivery infrastructure and uses valid transport encryption. This reduces direct infrastructure exposure and supports reliable service delivery, although protective hosting is a security mitigation rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS16509, operated by AMAZON-02 — Amazon.com, Inc., US.
- The site’s TLS certificate was issued by Amazon RSA 2048 M04 with domain validation and is valid until 18 October 2026.

Closing Assessment

Prospective users may interact with FXEmpire normally, while independently evaluating any third-party financial provider before opening or funding an account.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
--------	--------

Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fxempire.com.

- The request stayed on fxempire.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Wild West Domains, LLC. [CLEAR](#)
- DNS for this domain is served by awsdns-60.org, across 4 name servers. [NOTED](#)
- The registration is paid up to 2028-11-15. [CLEAR](#)
- The earliest public archive of this site is from 2004-04-27. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fxempire.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
