

Is fxo.us legit? TrustSniffer's high-trust assessment: 100/100

fxo.us

Verdict

100

OUT OF 100

HIGH TRUST

fxo.us appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-08 by automated analysis. Classification confidence 75%.

What this site appears to be

FXO is a Portuguese-language corporate site offering networking, Wi-Fi, cloud and managed cybersecurity services with partner integrations (Fortinet, Ruckus, Blackberry). The site includes company contact details and a contact form; no investment or credential-harvesting behavior detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is FXO's corporate presence for networking, Wi-Fi, cloud, managed cybersecurity, support, and consulting services, presenting a client-facing technology-services business supported by partner integrations including Fortinet, Ruckus, and Blackberry.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or investment-solicitation mechanics were observed. The site's sustained historical presence and consistent corporate presentation support an established identity rather than a recently repurposed or deceptive operation.

- Domain registration record: registered 2015-02-15, approximately 11.47 years old.
- Web archive: 661 snapshots spanning 2006-11-10 to 2026-05-30, across 21 tracked years.
- Homepage: corporate-services presentation with no login form, credential-harvesting behavior, crypto features, or investment solicitation.

Regulatory Verification Notes

FXO presents ordinary commercial technology services rather than a financial product. The reviewed site does not state a license number or regulated authorization; this is a transparency item relevant only if a proposed engagement falls within a regulated activity. External screening found no malicious or suspicious detections, and the registration record identifies NAMECHEAP INC and the organization FXO.

- Hosting telemetry: served on AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Transport security: TLS certificate issued by WE1, validation level DV, valid through 2026-09-13.
- Contact page: provides company contact details and a standard contact form without sensitive fields.

What to Verify Next

For a material engagement, the contracting entity should be matched against the applicable corporate registry, and any sector-specific authorization should be confirmed with the relevant regulator where required. Commercial commitments should also undergo normal procurement, contract, and service-level review.

- Contact page: provides the stated channel for confirming the contracting entity and service scope.
- Site navigation: identifies the services, partners, and contact areas needed for procurement review.

Summary Verdict

The website presents as legitimate, established, and trustworthy, with no observed contradictions or abuse patterns. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses were CDN edge servers, and no origin server address was exposed during the analysis; this reduces direct origin exposure but is a mitigating control rather than proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal interaction, while significant commercial commitments should follow standard procurement and contractual controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fxo.us.

- The request stayed on fxo.us. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by awsdns-12.net, across 4 name servers. NOTED
- The registration is paid up to 2027-02-14. NOTED
- The earliest public archive of this site is from 2006-11-10. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fxo.us at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
