

Is fxshield.co.kr legit? TrustSniffer's high-trust assessment: 85/100

fxshield.co.kr

Verdict

85

OUT OF 100

HIGH TRUST

fxshield.co.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 59%.

What this site appears to be

A multilingual human-verification page requiring JavaScript and a CAPTCHA puzzle, with a temporary error message.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

fxshield.co.kr presents a multilingual human-verification interstitial requiring JavaScript and a CAPTCHA puzzle before access, indicating a bot-protection gateway rather than exposing the underlying service or business model.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malware, or other contradictory signals were identified. The verification page contains no fraud indicators, sensitive forms, suspicious destinations, wallet-drainer behavior, or cloaking, and observed network activity was classified as benign. The available historical record supports an established online presence without evidence of suspicious repurposing.

- The homepage displays a human-verification and CAPTCHA challenge with no login or credential form.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.
- The domain was registered on 2015-06-23 and is approximately 11.12 years old.
- Historical records contain 137 snapshots spanning 2018–2025 across 8 tracked years.

Regulatory Verification Notes

The accessible page does not identify the underlying operator, service, licensing status, or applicable regulatory authority because it remains an access-control interstitial. This is a transparency limitation for regulatory assessment, not evidence of fraud. Registration records identify NSHC and Gabia, Inc.; the site's transport security is provided through a valid domain-validated certificate issued by Amazon RSA 2048 M01.

- The accessible homepage provides no company, license, registration-number, or terms disclosure.
- The domain registrar is Gabia, Inc.
- The site is served from AS16509, Amazon.com, Inc., US.
- TLS is domain-validated, issued by Amazon RSA 2048 M01, and valid through 2026-12-24.

What to Verify Next

Once the underlying service is accessible, confirm the named operating entity and any required licensing through the relevant official registry, and validate published support or contact channels through an independently sourced route.

- The homepage currently exposes only a verification gateway and no business or legal disclosures.
- The page provides no reliable information about the underlying service or monetization model.
- No licensing claim or license number is presented on the accessible page.

Summary Verdict

The site presents as a legitimate, established, and trustworthy website with no observed contradiction or confirmed abuse signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed addresses belonging to AS16509 edge servers and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not independent proof of legitimacy.

Closing Assessment

Normal account login and standard use are appropriate, subject to ordinary organizational security controls and confirmation of the underlying service once access is available.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fxshield.co.kr.

- The request stayed on fxshield.co.kr. It was not redirected to another domain. CLEAR
- Registration is published under Gabia, Inc.(http://www.gabia.co.kr). CLEAR
- DNS for this domain is served by awsdns-39.net, across 4 name servers. NOTED
- The registration is paid up to 2028-06-23. CLEAR
- The earliest public archive of this site is from 2018-08-10. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fxshield.co.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
