

Is fxstreet.com legit? TrustSniffer's high-trust assessment: 90/100

fxstreet.com

Verdict

90

OUT OF 100

HIGH TRUST

fxstreet.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 45%.

What this site appears to be

FXStreet is an established forex and financial-market news portal offering market news, analysis, charts, economic calendars, broker reviews, educational content, and sponsored material. The page includes prominent investment-risk disclaimers and states that its information is not personalized investment advice.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

FXStreet is an established forex and financial-market information portal presenting market news, analysis, charts, economic calendars, broker reviews, educational material, cryptocurrency coverage, advertising, and sponsored content; its apparent business model is information publishing supported by advertising, partnerships, reviews, and premium features rather than deposit solicitation or promised investment returns.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, reputation, and behavioral signals. The homepage presents a coherent news-and-analysis business, includes investment-risk disclaimers, and does not use deceptive deposit-before-service mechanics, impersonate another brand, or expose hidden credential-collection forms. Its coverage of Bitcoin, Ethereum, Ripple, Cardano, Solana, and Dogecoin is consistent with financial-market journalism rather than evidence of a fraudulent investment offer.

- The homepage identifies the service as "FXStreet - The Forex Market" and provides news, analysis, charts, and market tools.
- The homepage contains no sensitive forms, hidden forms, wallet-connect activity, or observed wallet-drainer behavior.
- External reputation checks recorded zero malicious and zero suspicious detections, with the domain ranked 20,314 globally and within the top one million.

Regulatory Verification Notes

The site operates as a financial-information publisher and explicitly distinguishes its material from personalized investment advice. Its legal and disclosure content supports that publishing model, although no specific financial-services license or registration number is claimed on the supplied pages; this is a transparency point for regulatory diligence, not evidence of impersonation or fraud. No matching third-party broker warning was identified.

- The homepage states that its information is not personalized investment advice and displays investment-risk disclaimers.
- The site's stated revenue model comprises advertising, sponsored content, broker reviews, partnerships, and premium features rather than primarily soliciting deposits.
- The domain was registered in 2000 and is approximately 26.13 years old through Network Solutions, LLC.

- Hosted on AS13335 (Cloudflare); TLS certificate issued by Sectigo Public Server Authentication CA DV R36, DV validation, valid to 2026-11-30.

What to Verify Next

For any regulated financial activity considered through linked third parties, confirm the relevant provider’s authorization directly with the applicable regulator and independently validate the site’s official support and contact channels. Sponsored content and broker reviews should be assessed separately from FXStreet’s editorial reporting.

- The homepage separates editorial material from sponsored and promotional content.
- Broker reviews, rankings, partnerships, and premium features are presented as distinct commercial elements.
- The site provides prominent risk disclosures alongside its market-information content.

Summary Verdict

FXStreet presents as a legitimate, established, and trustworthy financial-information website with a coherent business purpose and no observed scam or impersonation indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF protection, with observed traffic terminating on Cloudflare edge infrastructure rather than an exposed origin address. This reduces direct origin exposure and is a mitigating security measure, but it is not independent proof of legitimacy.

Closing Assessment

Normal use is appropriate, with ordinary professional diligence applied to any consequential financial decision or third-party service reached through the site.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fxstreet.com.

- The request stayed on fxstreet.com. It was not redirected to another domain. CLEAR

- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fxstreet.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
