

Is fyqlg.com legit? TrustSniffer's high-trust assessment: 95/100

fyqlg.com

Verdict

95

OUT OF 100

HIGH TRUST

fyqlg.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A municipal government site containing news, administrative notices, policy documents, service guides (e.g., trademark registration, consumer protection). The visible text contains repeated betting-related keywords which appear out of place and may indicate content tampering or keyword injection, but there is no evidence of forms requesting credentials or payments.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents itself as a municipal government and public-service information portal, offering administrative notices, local news, consumer-protection information, trademark-registration guidance, policy documents, and public-service resources rather than a commercial product or payment service. Its apparent purpose is to provide official civic and regulatory information, although the homepage title and portions of its visible text contain unrelated betting terminology that does not fit that stated role.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or other confirmed contradiction was observed. The principal integrity concern is content inconsistency: the homepage contains repeated betting-related keywords and a betting-oriented title despite otherwise presenting municipal-government material, which may indicate content injection or corruption rather than an intended business model. The site does not present login or payment forms, and observed behavior showed no credential harvesting, wallet activity, or external submission activity. The available evidence therefore supports a low scam/impersonation risk assessment, while the apparent municipal identity remains unverified as a real-world operator.

EVIDENCE

- The homepage contains municipal notices, consumer-protection material, trademark-registration guidance, and administrative updates, but its visible title is dominated by betting-related terminology.
- The homepage contains no forms, login fields, password submissions, or payment-request mechanisms.
- External reputation checks recorded no blacklist or malicious detections, and the broker-reputation dataset contained no matching record.

Regulatory Verification Notes

The site's apparent public-service function is supported by its administrative subject matter, including government notices, legal-policy documents, and consumer-protection guidance. It does not present a commercial license claim or license number, and the available material does not independently connect the site to a specific government entity; this is a verification and disclosure matter, not evidence of a scam. Domain registration is administered through NameSilo, LLC with privacy-protected registrant details, which is an administrative registration characteristic rather than an identity contradiction. The site's valid transport encryption and identified hosting infrastructure provide technical support for an established web presence, but do not prove governmental affiliation.

EVIDENCE

- Registration record: created 2018-07-23, recorded age 8.08 years, expiration 2027-07-23; registrar NameSilo, LLC.
- Served from AS398823, PEG-LA - PEG TECH INC, US.
- TLS certificate issued by YR1 with DV validation, valid to 2026-11-02.
- The homepage and service-information content contain administrative notices, trademark-registration guidance, consumer-protection material, and references to public regulations.

What to Verify Next

Before treating the site as an official municipal channel, independently confirm its affiliation through a government directory or an offline contact route published by the relevant authority. Confirm that current notices, service instructions, and contact details correspond with the authority's independently verified records, particularly because the homepage contains unrelated betting text. For any future credential or payment interaction, conduct ordinary independent checks of the responsible entity, applicable terms, and available payment protections.

EVIDENCE

- The site's apparent government identity is based on homepage and service-guide content rather than an independently verified operator connection.
- The homepage contains a material mismatch between its municipal subject matter and betting-related title and keywords.
- The site presents no sensitive forms or payment workflow requiring immediate transactional validation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk informational website, and no scam, phishing, blacklist, or identity-contradiction signal was observed. The overall trust posture is high, but the real-world operator identity is not independently verified and the homepage’s content integrity warrants contextual validation before it is relied upon as an official government source.

Infrastructure Integrity

The site resolves directly to hosting provided by PEG-LA - PEG TECH INC in the United States on AS398823; no CDN or WAF was detected, and one directly resolved address was identified. This infrastructure is technically coherent and provides no observed indication of malicious network behavior, although hosting protection should be treated as a mitigating technical factor rather than proof of legitimacy.

Closing Assessment

Ordinary informational use is proportionate to the assessed posture; credential or payment interactions should follow independent checks of the responsible entity, terms, and payment protections before proceeding.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fyqlg.com.

- The request stayed on fyqlg.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-07-23. NOTED
- The earliest public archive of this site is from 2015-09-27. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fyqlg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
