### Overview

Fztvseries.ng is an entertainment download portal presenting movies and television series across regional and genre categories, apparently supported by advertising and pop-up revenue rather than direct payments or financial returns.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents ordinary entertainment listings, discloses that pop-up advertisements may appear, and provides a search function without login, password, payment, or wallet-connection features. External reputation checks found no malicious or suspicious detections, no blacklist result, and no brand-impersonation or phishing indicators. The site's multi-year registration and continuous archived presence further support an established identity.

- Registered in 2023 (~2.75 years old), according to the domain registration record.
- 23 archive snapshots spanning 2023–2026, with four years tracked.
- The homepage contains one non-sensitive search form and no login form.
- The homepage's stated pop-ad behavior is disclosed to visitors.

### Regulatory Verification Notes

The supplied site content does not identify a licensing authority or registration number. For an entertainment download portal, this is a transparency item concerning applicable operating or content-rights disclosures, not evidence of impersonation or fraud. The domain is registered through HostAfrica, and its transport security is provided by a valid DV certificate issued by WE1.

- Registrar: HostAfrica; registration expires 2026-11-03.
- Hosted on AS13335 (Cloudflare).
- TLS certificate issued by WE1 (DV), valid to 2026-09-19.
- No broker-dataset match was identified.

### What to Verify Next

Any prospective organizational engagement should confirm applicable content-rights and operating disclosures through independent sources. The Telegram channel promoted from the homepage should also be authenticated through same-domain navigation or an independently established channel reference.

- The homepage promotes a Telegram channel as an external audience channel.
- The homepage's only detected form is a site-search form, limiting the available basis for assessing account or transaction workflows.

Summary Verdict

The website presents a legitimate, established, and trustworthy informational service with a low-risk content profile and no observed scam, phishing, impersonation, or identity-conflict indicators. Normal interaction with the site is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. Observed addresses are CDN edge IPs, including 104.21.56.250 and 172.67.157.60; the origin server was not observable, which limits direct origin exposure and is a mitigating infrastructure characteristic.

Closing Assessment

Normal browsing, searching, and standard interaction are appropriate, subject to ordinary organizational controls for advertising-supported websites.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about fztvseries.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
