

Is g6mibm8b3.top safe? TrustSniffer's moderate-trust assessment: 50/100

g6mibm8b3.top

Verdict

50

OUT OF 100

MODERATE TRUST

g6mibm8b3.top is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be	Content-heavy adult/video aggregation page in Chinese/Japanese with many explicit tags and listings. Appears to index/collect links and titles from other sources; contains potentially illegal/objectionable topics. Lacks identifiable trust markers, contact details, or verified provenance.

What g6mibm8b3.top served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Chinese- and Japanese-language adult-video aggregation page that indexes explicit titles, tags, and links from other sources. Its apparent model is free content discovery supported by advertising, referral or affiliate traffic, rather than the provision of a clearly defined paid or regulated service.

Scam/Impersonation Risk

No phishing, brand-impersonation, blacklist, or other confirmed contradiction was observed. The principal concern is content and provenance rather than impersonation: the homepage presents extensive explicit listings, including categories referencing Japanese adult video, pornography, BDSM, incest, and potentially non-consensual themes, while offering no clear explanation of source rights, moderation, or content provenance. The page also contains a mixture of unrelated titles and search-oriented phrases, which is consistent with a traffic-acquisition aggregator and weakens confidence in editorial control, but does not by itself establish fraud. No login form, hidden sensitive form, wallet interaction, or password-submission destination was observed.

EVIDENCE

- Homepage: Chinese- and Japanese-language adult-video titles, explicit tags, and category listings are displayed across multiple content sections.
- Homepage behavior: Two external XHR requests and substantial post-interaction DOM changes were observed, with no detected password form, hidden form, wallet connection, clipboard hijack, or cloaking.
- External reputation observations: No confirmed malicious, phishing, or blacklist finding was recorded; the available coverage was partial.

Regulatory Verification Notes

The website's apparent activity is informational and advertising-supported rather than an identifiable financial or regulated service. Nevertheless, the homepage does not present a clearly identifiable operator, contact address, or verified provenance, and the available material does not establish who is responsible for the indexed content or its moderation. This is a transparency and accountability gap, not evidence of a scam. Independent identity verification remains unavailable, and the domain's registration is privacy-protected through Spaceship, Inc.; that is an administrative limitation rather than an identity contradiction. No matching third-party broker profile was found, but that absence is contextual only and is not a licensing determination.

EVIDENCE

- Homepage: No clear product, service-fee structure, operator identity, or contact details are presented.
- Registration record: Registered 2025-06-30 (~1.14 years old), expiring 2027-06-30, through Spaceship, Inc.; registrant details are privacy-protected.
- Hosting infrastructure: Served from AS13335 (Cloudflare, Inc., US).
- Transport security: TLS certificate issued by WE1 with DV validation, valid to 2026-09-20.

What to Verify Next

Before any sensitive interaction, an organization should confirm the site's operator and content-authorisation position through an independently obtained contact channel rather than relying solely on information displayed on the page. The responsible party should also be checked against applicable content-hosting, copyright, age-verification, and local-law requirements. Any advertising, referral destination, download prompt, or third-party redirect should be assessed separately before interaction, and endpoint controls should be applied where access to explicit or potentially unlawful material is restricted.

EVIDENCE

- Homepage: The site provides indexed titles and links but no verifiable operator or provenance statement.
- Homepage structure: No forms, login workflow, or clear transactional service was identified.
- Page metadata: No meaningful title metadata, description, canonical declaration, or structured identity data was detected.

Summary Verdict

The site has a **moderate trust posture** with no observed scam or impersonation contradiction, but its real-world operator and accountability remain unverified. The evidence supports limited, ordinary browsing with restrained confidence rather than an endorsement for sensitive or high-value engagement.

Infrastructure Integrity

Cloudflare CDN and WAF protection were observed, with all resolved addresses belonging to Cloudflare edge infrastructure and no origin candidate identified. This reduces direct exposure of the underlying host and is a mitigating technical control, but it does not establish the legitimacy of the site or the provenance of its content.

Closing Assessment

Ordinary low-impact browsing may proceed within applicable organizational content policies, while independent verification and heightened caution are appropriate before any sensitive action, download, payment, or interaction with third-party destinations.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of g6mibm8b3.top.

- The request stayed on g6mibm8b3.top. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-30. NOTED
- The earliest public archive of this site is from 2024-06-22. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about g6mibm8b3.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
