- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Galaxystore is a Russian-language Samsung electronics retailer presenting smartphones, tablets, computers, televisions, appliances, wearables, audio products, accessories, delivery, promotions, and account-based loyalty benefits through an online storefront whose stated purpose is retail sales and related customer services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent Samsung retail catalogue, ordering and delivery functions, customer support, and account services, while the supplied page analysis found no phishing, malware, financial-manipulation, or brand-impersonation indicators. External reputation checks were clean, with no malicious or suspicious detections and no matching broker warning.

- The homepage identifies the business as a Samsung electronics storefront and presents a substantial product catalogue, pricing, ordering, delivery, and support functions.
- The homepage archive shows 885 snapshots spanning 2012–2026, covering 15 tracked years.
- The domain was registered in 2015 and is approximately 11.32 years old through the observed registration record.

Regulatory Verification Notes

The site presents itself as an official Samsung representative and describes original products with warranty support. The supplied evidence does not establish a claimed financial or regulatory license; this is a transparency point for commercial due diligence, not evidence of fraud. The site's established operating history, clean external reputation, and coherent retail presentation support its legitimacy assessment.

- The homepage title and content describe an official Samsung retail network serving major Russian cities.
- The domain registrar is RU-CENTER-RU; observed registration runs from 2015-04-08 to 2027-04-08.
- The site is served from AS57724, operated by DDOS-GUARD - DDOS-GUARD LTD, RU.
- TLS uses GlobalSign GCC R3 EV TLS CA 2025 with EV validation and is valid through 2026-10-31.

What to Verify Next

For procurement or high-value commercial engagement, confirm the seller's corporate details, warranty arrangements, and any applicable retail authorizations through Samsung's independently published channels and the relevant Russian business registries. Confirm payment, delivery, and returns terms before completing unusually large orders.

- The homepage provides delivery, support, promotions, account, and order-tracking functions that can be checked against the published commercial terms.
- The homepage claims official-representative status and original products with warranty support; those claims are suitable for independent confirmation.
- The contact and support details should be cross-checked through an independently sourced business channel.

Summary Verdict

The site has a legitimate, established, and trustworthy posture. Converging evidence from its durable presence, clean reputation, strong commercial content, and valid organizationally validated encryption supports normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves directly to infrastructure hosted by DDOS-GUARD in Russia, with no CDN or WAF edge identified and one likely origin address observed. This is a neutral hosting characteristic rather than a legitimacy concern; the valid EV certificate and identifiable hosting environment provide useful technical continuity signals.

Closing Assessment

Normal retail interaction is appropriate, with standard commercial due diligence remaining suitable for unusually large purchases or institutional engagement.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of galaxystore.ru.

- The request stayed on galaxystore.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 6 name servers. NOTED
- The registration is paid up to 2027-04-08. NOTED
- The earliest public archive of this site is from 2012-06-18. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [galaxystore.ru](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
