Full analysis

Overview

Gallop TV is a South African and international horse-racing streaming and information platform presenting live races, race cards, results, previews, replays, news, podcasts, and related betting content, with account access for uninterrupted viewing.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The homepage includes login, registration, and password-reset functionality linked to a stated platform migration; this creates a credential-channel consideration, but the observed reset and login forms had no untrusted destinations, hidden forms, cloaking, wallet activity, or suspicious scripts. The site's sustained archive presence and consistent horse-racing presentation support an established identity rather than an impersonation pattern.

- The homepage presents horse-racing livestreams, race cards, results, replays, news, and podcasts.
- The domain was registered in 2021 and is approximately 4.76 years old.
- The archive contains 99 snapshots spanning 2022–2026, covering 5 years.

Regulatory Verification Notes

Gallop TV presents itself primarily as an informational and streaming service, while its homepage includes betting-related links. No specific licensing claim or license number is identified in the supplied site content, and the monetization model is not clearly specified; this is a transparency item for regulatory verification, not evidence of deception. The available legal navigation includes Terms of Use and a POPI Disclaimer, and no matching third-party broker profile was identified.

- The homepage links to About, FAQs, Terms of Use, and POPI Disclaimer pages.
- The registration record identifies DIAMATRIX C.C. as registrar and HOLLYWOOD CONNECT (PTY) LTD - RACE COAST KZN - HWC003216 as the registrant organization.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-09-09.
- The site is served from AS16509, Amazon.com, Inc., US.

What to Verify Next

For any regulated betting or wagering activity, confirm the relevant operator and licensing position through the applicable South African registry before relying on those services. Independently confirm official account-support channels through the site's legal or contact pathways before making material account changes.

- The homepage separates free racing content from betting-related navigation.
- The Terms of Use and POPI Disclaimer provide the appropriate pages for confirming service conditions and data-handling responsibilities.

Summary Verdict

Gallop TV presents as a legitimate, established, and trustworthy sports-streaming platform with a low observed abuse profile and no identified impersonation or fraud contradiction. Normal interaction, including account login and standard account use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed edge addresses associated with AS16509; no origin candidate was exposed during analysis. This provides a meaningful defensive layer against direct origin exposure but is a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard use is appropriate, with regulatory confirmation reserved for any betting-related service or materially regulated activity.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about galloptv.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
