

Is galxboy.co.za legit? TrustSniffer's high-trust assessment: 100/100

galxboy.co.za

Verdict

100

OUT OF 100

HIGH TRUST

galxboy.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

GALXBOY ecommerce site: product catalogs (apparel, footwear, accessories), membership/login, newsletter signup, blog and company info. Standard retail flows (cart, store locator, policies) visible.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

GALXBOY is a consumer-facing fashion ecommerce website presenting apparel, footwear, accessories, product collections, membership access, shopping-cart functionality, store-location services, and promotional community features. Its apparent business model is direct-to-consumer retail supported by product sales, member accounts, newsletters, and limited or promotional drops.

Scam/Impersonation Risk

No contradictions were observed across the available website and reputation evidence: there were no phishing, impersonation, malicious-site, or brand-mismatch indicators. The homepage has the structure expected of a retail storefront, including product navigation, cart functionality, account access, delivery and returns messaging, and store-related content. Interaction telemetry did show external network activity and substantial page changes after interaction, but the same observations did not identify cloaking, hidden forms, credential exfiltration, wallet activity, clipboard manipulation, or other high-risk abuse patterns. Reports associated with the observed IP address are attributed to shared CDN infrastructure rather than specifically to GALXBOY, and the associated confidence score was zero with the address marked as whitelisted.

EVIDENCE

- The homepage is classified as an ecommerce/retail page with no detected red flags and presents standard catalog, cart, login, newsletter, delivery, and returns elements.
- The site's account form is a visible login function; no hidden forms, external password forms, wallet connections, wallet-drainer behavior, or clipboard hijacking were detected.
- The observed IP has 180 abuse reports attributed to shared Shopify CDN infrastructure, with a whitelisted status and confidence score of 0; the reports are not attributed specifically to the website.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate fashion retailer, but the real-world operator identity is not independently verified. The site includes company-information, policy, store-location, and careers content, although the available material does not establish a legal entity or independently confirm ownership. No financial-services licensing claim or license number is presented; for this retail business model, that is a disclosure and merchant-verification matter rather than evidence of impersonation or fraud. The external broker-reputation dataset contained no match.

EVIDENCE

- The domain was registered on 2019-05-22 and is approximately 7.22 years old; the registrar is Afrihost.
- The domain has 134 archive snapshots from 2020-11-01 through 2026-02-01, spanning 7 tracked years.
- Hosting is provided through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by YE2, uses DV validation, and is valid until 2026-11-03.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant's legal identity using the company information and an offline or independently sourced contact route. The published delivery, returns, and refund terms should be checked for consistency with the intended purchase and applicable consumer protections. Payment should be made through a method that provides dispute or chargeback protection, and the official account and support channels should be confirmed before sensitive information is submitted.

EVIDENCE

- The homepage exposes delivery messaging, online or in-store returns, store-location functionality, and a membership login.
- The site includes policy, company-information, careers, and community-related navigation suitable for independent merchant checks.
- The visible forms are limited to account login and newsletter subscription; no sensitive payment form was identified in the examined page content.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam or impersonation contradiction was identified, although the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF infrastructure, with observed traffic terminating at CDN edge infrastructure rather than a directly exposed origin. This provides a meaningful layer of exposure mitigation, but it is a protective control rather than proof of merchant legitimacy.

Closing Assessment

Normal browsing and ordinary retail interaction are proportionate to the assessed posture, subject to the routine independent merchant, returns, and payment-protection checks expected before credentials or payment details are provided.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 180 reports on hosting IP 23.227.38.65 (Shopify, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of galxboy.co.za.

- The request stayed on galxboy.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Afrihost. CLEAR
- DNS for this domain is served by co.za, across 4 name servers. NOTED
- The registration is paid up to 2027-05-22. NOTED
- The earliest public archive of this site is from 2020-11-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about galxboy.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
