

Is gamblerigmod.org a scam? TrustSniffer's high-risk assessment: 0/100

gamblerigmod.org

Verdict

0

OUT OF 100

CRITICAL RISK

gamblerigmod.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-18 by automated analysis. Classification confidence 55%.

What this site appears to be

Gamble Rig is a free, open-source Minecraft Fabric mod that claims to rig DonutSMP dispenser-based casino games (Paper Game, 50/50, Blackjack, Roulette) by manipulating server-side dropper outputs. The site provides downloads, installation steps, and an FAQ. The content promotes cheating and offers downloadable jars (potential malware vector); claims about server-side control are difficult to verify from the page alone.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://gamblerigmod.org/

What gamblerigmod.org served when TrustSniffer captured it on 2026-09-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Gamble Rig is a software-download website presenting a free, open-source Minecraft Fabric mod intended to manipulate DonutSMP casino games, including Paper Game, 50/50, Blackjack, and Roulette, through downloadable Java archive files, installation instructions, and an FAQ.

Scam/Impersonation Risk

Contradictory risk signals are present. External security intelligence identifies malicious activity associated with the domain and places it on confirmed blacklists, while the site distributes executable JAR files and promotes claims that it can alter server-side casino outcomes. The homepage describes “winning every game,” forcing 50/50 results, controlling roulette outcomes, and modifying what the server returns; these claims are difficult to substantiate from the page and create clear claim-evidence dissonance. No conflicting legal-entity names or

direct brand-impersonation finding was established, but the external detections and downloadable executable content warrant a strongly cautionary posture. The absence of login and payment forms reduces the observed credential-capture surface, but does not resolve the file-distribution risk.

EVIDENCE

- The homepage advertises “Gamble Rig 26.2 for Fabric” as a mod that rigs DonutSMP Paper Game, 50/50, Blackjack, and Roulette outcomes.
- The homepage offers downloadable JAR files and describes a “server-side trick” that allegedly changes the outputs returned by the server.
- External reputation telemetry records 7 malicious detections, with Fortinet and Sophos among the flagged vendors, and confirms an external blacklist hit.

Regulatory Verification Notes

The site presents itself as a free open-source game-mod project rather than a regulated financial or gambling service, and no payment or subscription model is shown. Nevertheless, the supplied pages do not identify an accountable operator, licensing authority, registration number, or clear legal framework governing the distribution and claimed functionality. This is a material transparency gap for software offered as an executable download, particularly where the site makes server-manipulation claims without supporting technical evidence. The domain is also very recently registered, which provides little operating history for assessing continuity or accountability.

EVIDENCE

- The homepage, installation content, and FAQ describe the software and its use but do not identify a corporate operator or licensing authority.
- WHOIS records show registration on 2026-08-25, approximately 0.07 years before collection, through Internet Domain Service BS Corp; expiry is 2027-08-25.
- The site’s transport certificate is issued by YE1 with Domain Validation, valid until 2026-12-16 17:48:02 UTC.
- The site is served through AS203273, identified as NetCraftersOU - NetCrafters OU, EE.

What to Verify Next

Before any interaction beyond viewing the pages, an enterprise or individual should obtain the mod through an independently authenticated project channel, compare the file against a publisher-provided cryptographic hash, and inspect the source and build provenance rather than executing an unverified archive. The operator’s identity and any applicable legal status should be confirmed through an independent registry or offline contact route, and the relevant game-server rules should be checked before installing or using software intended to alter outcomes.

EVIDENCE

- The homepage provides direct software downloads and installation instructions, making file provenance and integrity the immediate verification priority.
- The site's FAQ and feature pages make server-side manipulation claims without presenting independently verifiable technical evidence.
- The supplied pages do not provide a clearly identified operator or licensing authority for independent confirmation.

Summary Verdict

The website has a **critical trust posture** because confirmed external blacklist and malicious-detection signals outweigh the site's coherent presentation and valid transport encryption. Its identity remains unverified, and the combination of executable distribution, dishonest-use functionality, and unsupported technical claims is unsuitable for sensitive interaction.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer at the network edge, but it does not establish legitimacy. All observed addressing was associated with a CDN edge, and the origin server was not observable in this analysis; that architecture can limit independent hosting verification and permit rapid content changes.

Closing Assessment

The appropriate posture is read-only review while independent file, operator, and provenance checks remain outstanding; credentials, financial information, and execution of downloaded files should not be introduced into the interaction.

Written analysis generated 2026-09-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gamblerigmod.org.

- The request stayed on gamblerigmod.org. It was not redirected to another domain. CLEAR
- Registration is published under Internet Domain Service BS Corp. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-25. NOTED
- It is hosted on NetCraftersOU, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gamblerigmod.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
