

Is gameblog.fr legit? TrustSniffer's high-trust assessment: 100/100

gameblog.fr

Verdict

100

OUT OF 100

HIGH TRUST

gameblog.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

French-language gaming news portal publishing timely articles, reviews, guides and deal roundups. Content appears editorial and consumer-oriented; monetization implied via advertising and affiliate/sponsored posts. No financial product solicitations or credential harvesting detected.

- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Gameblog.fr is a French-language gaming news and media portal presenting current video-game news, reviews, guides, technical and geek coverage, podcasts, and deal roundups for console and PC audiences. Its apparent business model is advertising-supported editorial publishing, with likely affiliate and sponsored-content monetization rather than financial services or user deposits.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a consistent editorial identity centred on video games, including news, tests, guides, buying advice, and deals, and the observed content does not solicit deposits, promote financial products, request credentials, or display phishing mechanics. External reputation checks were clean, with no confirmed malicious, suspicious, phishing, or blacklist finding, while the site's long-running historical presence remains aligned with the current gaming-news category rather than showing suspicious repurposing. Normal interaction with the site is appropriate.

EVIDENCE

- Homepage: French-language gaming-news presentation with sections for news, tests, guides, buying advice, deals, podcasts, and platform coverage.
- Domain registration: Registered 2007 (~19 years old); registrar identified as OVH.
- Web archive: 5,000 snapshots spanning 2007–2022 (16 years tracked), with historical continuity in the gaming-blog/news category.
- External reputation: 0 malicious detections, 0 suspicious detections, no confirmed blacklist hit, and 0 abuse reports recorded for the observed infrastructure.

Regulatory Verification Notes

The site operates as an editorial media publication, not as a bank, broker, payment service, or investment platform. No financial-service licence or regulatory registration claim is presented in the supplied content; this is a minor disclosure point for any party considering a commercial, advertising, or publishing relationship, but it is not a fraud indicator in this context. The combination of an established domain, sustained historical activity, clean external reputation, and stable encrypted delivery supports the conclusion that the website is a legitimate operating publication.

EVIDENCE

- Homepage: Business presentation is limited to gaming journalism, reviews, guides, technical coverage, and consumer deals; no regulated financial service is advertised.
- Hosting infrastructure: Served from AS13335 (Cloudflare, Inc., US).
- Transport encryption: TLS certificate issued by WE1, validation level DV, valid to 2026-09-28.
- Registrar record: Domain registrar identified as OVH.

What to Verify Next

For a prospective commercial or institutional engagement, confirm that any advertising, affiliate, or sponsored-content relationship is documented through the publication's normal business channels and that the relevant editorial and commercial terms are current. Routine users may proceed with standard browsing and account functions where offered; any material partnership should retain ordinary vendor-onboarding and contractual controls.

EVIDENCE

- Homepage: Established editorial navigation provides the baseline for checking that future engagement remains within the site's stated media purpose.
- Article and deal sections: Review the applicable commercial labelling and disclosure language before formalizing a promotional relationship.
- Site account or contact workflows, where present: Use the site's standard authenticated or published channels for routine operational coordination.

Summary Verdict

Gameblog.fr presents a legitimate, established, and trustworthy posture with no observed scam or impersonation contradiction. The available evidence supports normal use, including account login and standard site interaction where those functions are offered.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, and all observed addresses were Cloudflare edge servers on AS13335; no origin candidate was exposed in the observed resolution. This arrangement reduces direct origin exposure and provides a meaningful defensive layer, while remaining a mitigating infrastructure signal rather than standalone proof of legitimacy.

Closing Assessment

Standard browsing and ordinary account interaction are appropriate, with normal organizational controls retained for any formal commercial engagement.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gameblog.fr.

- The request stayed on gameblog.fr. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-02. NOTED
- The earliest public archive of this site is from 2007-02-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gameblog.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
