Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official Japanese Game Market portal, supporting a large tabletop- and board-game event through event announcements, exhibitor applications, visitor guidance, booth and hall information, searchable game catalogs, and community-authored promotional content. Its apparent business model centers on event participation, attendance, sponsorship, and related commerce rather than financial investment or deposit-based returns.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious behavior were observed. The site's purpose is consistently expressed through substantial event-specific content, while its long operating history and continuing archival record support the conclusion that it is an established portal rather than a recently created imitation. External reputation checks were clean, and observed forms and network behavior showed no credential-harvesting, cloaking, wallet, clipboard, or suspicious-script activity.

- The homepage identifies the service as the official Game Market site and presents current operator announcements, event guidance, catalog searches, and exhibitor resources.
- The domain dates to 2006 (~19.75 years old); 1,250 archive snapshots span 2006–2026 (21 years tracked), with no evidence of suspicious repurposing or semantic drift.
- Reputation telemetry recorded no malicious or suspicious detections, no reported abuse, no confirmed phishing or impersonation, and an established global traffic footprint ranked 201,611.
- Interactive testing of the homepage found one nonsensitive search or catalog-filter form, no login form, no hidden forms, and no untrusted form destination.

Regulatory Verification Notes

The portal presents an event-marketplace function rather than a regulated financial service, so no financial-services licence would ordinarily be expected from the activities observed. Links to operator information, terms, privacy information, contact facilities, exhibitor guidance, and visitor FAQs provide an appropriate disclosure framework for its stated purpose. No adverse broker-related match was identified; this is contextual reputation information rather than a licensing determination.

- The homepage navigation provides access to operator, terms, privacy, contact, exhibitor-application, and visitor-FAQ materials.
- The exhibitor area supports applications for participation in the event, consistent with the portal's disclosed operational role.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's transport encryption uses a DV TLS certificate issued by Amazon RSA 2048 M04, valid to 2026-11-17.

What to Verify Next

For event participation or purchases, prospective attendees and exhibitors should confirm the applicable event date, venue, booth identity, pricing, cancellation terms, and payment instructions on the relevant official pages. Material commercial arrangements should also be reconciled against the governing exhibitor terms and independently confirmed operator channels.

- The event-information area supplies dedicated schedule, access, booth-map, and hall-information resources for transaction-specific confirmation.
- Individual game and booth listings provide the appropriate records for checking the identity and offer of a particular exhibitor.
- The terms and privacy pages provide the governing materials to review before submitting an exhibitor application or completing event-related commerce.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical continuity, substantive event operations, clean external reputation, and benign observed behavior converge without contradiction, supporting normal interaction, including account login and standard use where those functions are offered.

Infrastructure Integrity

The website uses AWS CDN/WAF protection, with observed traffic terminating at the edge addresses 3.113.57.68 and 43.206.195.139. This mainstream protective architecture reduces direct origin exposure and provides a mitigating security control, although infrastructure protection alone is not proof of legitimacy.

Closing Assessment

Normal visitor, exhibitor, account, and standard transaction activity is appropriate, subject to ordinary review of the terms and event-specific details applicable to the intended interaction.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gamemarket.jp.

- The request stayed on gamemarket.jp. It was not redirected to another domain. CLEAR

- The earliest public archive of this site is from 2006-10-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gamemarket.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
