

Is gardentlabs.hu a scam? TrustSniffer's high-risk assessment: 0/100

gardentlabs.hu

Verdict

0

OUT OF 100

CRITICAL RISK

gardentlabs.hu shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Auto-generated index page listing files (Index of /). No forms, scripts, or monetization elements detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

https://gardentlabs.hu/

What gardentlabs.hu served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at gardentlabs.hu presents a bare server-generated “Index of /” directory that lists files for visitors to browse or download. It shows no visible company presentation, transactional service, account workflow, or monetization mechanism, so its apparent purpose is limited to static file hosting rather than an identifiable commercial operation.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence records malicious detections and blacklist status for the domain. This is a confirmed reputational contradiction, even though the observed homepage itself contains no login form, payment mechanism, suspicious script, or visible brand-impersonation content. The domain’s established registration and continuous archival presence provide historical continuity, but they do not neutralize the current external threat findings or independently verify the operator’s identity.

EVIDENCE

- External security telemetry recorded 9 malicious detections and 1 suspicious detection for the domain; blacklist status was confirmed by two external sources.
- The homepage is an auto-generated directory listing titled “Index of /,” with no forms, scripts, or monetization elements observed.
- Domain registration: 2017-10-23 (~8.83 years old); 313 archive snapshots spanning 2019–2026 (8 years tracked).

Regulatory Verification Notes

The observed site content does not identify a legal entity, regulated service, licensing authority, or license number. This is a material disclosure gap for any prospective engagement, and the real-world operator remains unverified. The site’s static presentation also provides no substantive business description against which regulatory obligations could be assessed. A valid domain-validated certificate and identifiable hosting are technical facts, not evidence of licensing or legal legitimacy.

EVIDENCE

- The homepage contains only the directory label, file-list headings, and no legal, corporate, or licensing disclosure.
- Hosted on AS51167 (CONTABO - Contabo GmbH, DE).
- TLS certificate issued by YR2, validation level DV, valid to 2026-11-13.

What to Verify Next

Before any sensitive interaction, an independent party should establish the operator’s legal identity and confirm any claimed activity with the relevant national or sector regulator. Contact channels and any proposed payment or service instructions should be validated through an independently sourced route rather than relying solely on information presented by the site.

EVIDENCE

- The observed homepage provides no identifiable commercial or regulatory context for selecting the appropriate legal entity or licensing registry.
- The site exposes no account, payment, or service workflow on the captured page, so any later request for such activity should be assessed separately and verified independently.

Summary Verdict

The available evidence supports a critical trust posture for sensitive interaction. Historical continuity and technically functional delivery do not overcome the confirmed external threat and blacklist findings, while the site does not independently establish who operates it or what legitimate service it represents.

Infrastructure Integrity

The site resolves directly to a single likely origin address and has no detected CDN or WAF layer. This means there is no identified edge-protection layer to mitigate exposure, although the hosting infrastructure itself is technically resolved and operational.

Closing Assessment

Restrict activity to passive observation until independent identity, regulatory, and contact-channel checks are completed; login, credential submission, and financial activity should not be undertaken.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gardentlabs.hu.

- The request stayed on gardentlabs.hu. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2019-08-21. CLEAR
- It is hosted on CONTABO, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gardentlabs.hu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
