

Is gcodetraining.it safe? TrustSniffer's low-trust assessment: 46/100

gcodetraining.it

Verdict

46

OUT OF 100

LOW TRUST

gcodetraining.it is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

This is a 403 Forbidden server response page (LiteSpeed Web Server). No application content, forms, or monetization present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://gcodetraining.it/>

What gcodetraining.it served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at gcodetraining.it currently presents a 403 Forbidden access-denied page powered by LiteSpeed Web Server rather than an identifiable service, product catalogue, or operating business. Its apparent purpose and business model therefore cannot be established from the accessible page.

Scam/Impersonation Risk

The site carries a **confirmed blacklist** signal, which is the principal contradiction affecting trust. External reputation evidence records one malicious and one suspicious detection, although no on-page brand impersonation, phishing form, credential collection, or wallet-drainer behavior was observed. The accessible page is only a generic server error, so it provides no substantive content capable of resolving or rebutting the external warning. No identity inconsistency between legal entities was observed.

EVIDENCE

- The root page returned “403 Forbidden” and exposed only a LiteSpeed Web Server access-denied message; it contained no application content, forms, or monetization.
- External reputation assessment recorded a blacklist hit, with `vt\_malicious: 1` and `vt\_suspicious: 1`.
- Domain registration records show creation on 2018-02-01T17:20:56Z and an age of 8.55 years.
- Historical coverage identifies first observation on 2019-08-24T12:08:27Z, last observation on 2025-11-10T23:22:28Z, and 7 years tracked; the available archival coverage is sparse.

Regulatory Verification Notes

The real-world operator remains unverified. The registration record identifies G CODE srl as the owner and DHH Switzerland SA as registrar, but the accessible website does not provide a functioning legal, terms, privacy, licensing, or regulatory-disclosure area from which business authorization could be assessed. This is a regulatory-transparency gap rather than, by itself, proof of fraud. The site has a valid domain-validated TLS certificate, but that confirms encrypted transport only and does not establish licensing or operator legitimacy.

EVIDENCE

- Registration records identify registrar DHH Switzerland SA and registrant organization G CODE srl.
- The accessible page contains no license claim, license number, or named regulatory authority.
- TLS is issued by YE2 at DV validation level and is valid to 2026-11-16T22:08:01+00:00.
- No match was identified in the supplied broker-reputation context.

What to Verify Next

Before any sensitive interaction, an independent corporate-registry check should confirm that G CODE srl is the intended operator and that its business activities correspond to the site. Any claimed financial, trading, training, or other regulated service should be matched against the relevant official authorization register, while terms, privacy, refund, and support pages should be obtained through an independently verified channel. Until those checks succeed, credentials and financial information should not be submitted.

EVIDENCE

- Independent operator verification is required because identity verification is currently unconfirmed.
- Regulatory-register verification is required because the accessible website provides no license or authorization details.
- The site should be rechecked through a verified access route because the available root page is an access-denied response rather than a substantive business page.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The confirmed blacklist signal, unverified operator identity, and absence of usable business content outweigh the ordinary technical indicators of a functioning domain and encrypted transport. The site should not presently be treated as an established or sufficiently validated counterparty.

Infrastructure Integrity

The domain resolves directly to one identified hosting address, with no CDN or WAF detected and no edge-IP layer separating the service from its apparent origin. It is hosted by SEEWEB - SEEWEB s.r.l., Italy, on AS12637; this infrastructure is technically identifiable but provides no independent legitimacy assurance.

Closing Assessment

Sensitive use should remain suspended until the operator, applicable authorization, and legitimate operating pages have been independently confirmed.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gcodetraining.it.

- The request stayed on gcodetraining.it. It was not redirected to another domain. CLEAR
- Registration is published under DHH Switzerland SA. CLEAR
- DNS for this domain is served by serverdomus.com. NOTED

- The registration is paid up to 2026-10-19. NOTED
- The earliest public archive of this site is from 2019-08-24. CLEAR
- It is hosted on SEEWEB, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gcodetraining.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
