Full analysis

Overview

This website is presented as Gelengi Yayınları, a Turkish publisher and bookstore offering literature, novels, children's books, and theatre titles, together with editorial excerpts, social-media engagement, book sales, and optional user accounts.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional publisher and book-retail model, and no brand impersonation, phishing page, or conflicting legal identity is identified in the supplied page analysis. However, a confirmed external blacklist record is a material contradiction that outweighs the otherwise ordinary presentation for sensitive interaction. External detections also recorded one malicious and one suspicious classification, so the site should be treated as capable of presenting meaningful exposure despite the absence of an obvious abuse pattern in its visible content. The apparent connection to a real-world publisher is therefore only likely, not independently verified.

EVIDENCE

- Domain registration records show registration on 2009-10-24, an age of 16.83 years, through Atak Domain; the registrant organization is recorded as “Registrant of gelengiyayinlari.com.”
- Web-archive records show 27 snapshots spanning 2011–2025, with 15 years tracked.
- External reputation checks recorded 1 malicious detection and 1 suspicious detection, together with a confirmed blacklist hit.
- The homepage presents ordinary publisher content and categories, while the site analysis reports no detected brand-impersonation indicators.

Regulatory Verification Notes

The homepage identifies the operation as Gelengi Yayınları and states that it is a brand of OPUS KÜLTÜR SANAT. The supplied visible content does not show a license, registration number, or other formal regulatory credential; for a book retailer this is a transparency and merchant-identity verification matter rather than proof of misconduct. The available evidence does not independently verify the operating entity, and the external warning remains a significant reputational signal. The TLS configuration confirms encrypted transport, but domain-validated encryption does not establish the operator’s legal identity.

EVIDENCE

- The homepage footer states: “Gelengi Yayınları, OPUS KÜLTÜR SANAT markasıdır.”
- No license number, registration number, or regulatory authority is shown in the supplied homepage content.
- The website is served from AS43260, identified as DGN TEKNOLOJİ A.Ş., TR.
- The TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-09-30 09:55:13 UTC.

What to Verify Next

Before any account creation, credential submission, or purchase, the publisher’s legal entity and business contact details should be confirmed through an independent source. Any applicable Turkish commercial, consumer-protection, or publishing registration should be checked against the relevant official registry, and payment should be limited to methods offering meaningful transaction dispute and recovery protections. The account-login flow should also be tested only after the site’s official contact channels and ownership claims have been independently corroborated.

EVIDENCE

- The homepage contains “Hakkımızda” and “İletişim” navigation, providing the relevant locations for checking entity and contact disclosures.
- The homepage includes an Instagram link, which can be compared independently with the publisher’s claimed identity and contact details.
- The site presents a login form requesting a username or email address and password.
- The business model is identified as publisher and book retailer with optional user accounts for purchases or account features.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. Although the website appears to operate as a conventional publisher and retailer, the confirmed external contradiction prevents the available evidence from supporting normal confidence in account, credential, or financial interactions. Legitimacy remains apparent rather than proven.

Infrastructure Integrity

The site resolves directly to one identified hosting address rather than a protected CDN edge, with hosting attributed to DGN TEKNOLOJİ A.Ş. in Türkiye. No CDN or WAF was detected, so the infrastructure provides limited intermediary protection; the valid DV certificate supports encrypted transport only and should not be treated as evidence of legitimacy.

Closing Assessment

Prospective users should restrict activity to non-sensitive browsing and defer account, credential, and financial interactions until the independent identity and reputation checks above are satisfactorily resolved.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gelengiyayinlari.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
