

Is geofloraconsultoria.com.br legit? TrustSniffer's high-trust assessment: 100/100

geofloraconsultoria.com.br

Verdict

100

OUT OF 100

HIGH TRUST

geofloraconsultoria.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Geoflora is an environmental consultancy and property marketplace focused on selling conserved land and providing licensing and land-regularization services in Minas Gerais, Brazil. The site lists numerous properties available for sale, service descriptions, testimonials and contact information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Geoflora is a Brazilian environmental consultancy and property marketplace that presents land-regularization, environmental licensing, conservation, and environmental-compensation services, alongside listings for conserved land and forest areas in Minas Gerais. Its apparent business model combines consulting services with property sales, commissions, and marketplace listings through “Geoflora Connect.”

Scam/Impersonation Risk

No contradictions were observed. The site’s substantive content is consistent with a corporate environmental-services and property-marketplace operation, and the supplied page analysis found no phishing, impersonation, deceptive-content, or other red-flag indicators. The homepage provides coherent service descriptions, testimonials, property listings, and contact information without presenting a login form, hidden sensitive form, wallet-connection flow, or suspicious browser behavior. External checks also recorded no malicious or suspicious detections and no blacklist hit.

EVIDENCE

- The homepage describes environmental consulting, land regularization, licensing, biodiversity conservation, and the commercialisation of conserved areas.
- The site's page analysis recorded no red flags, no suspected brand impersonation, and no phishing indicators.
- Interactive testing recorded no login form, hidden form, wallet-provider activity, clipboard manipulation, or suspicious inline scripts.
- The domain was registered on 2016-07-11 and is approximately 10.12 years old; registration is shown through 2028-07-11.
- Archive coverage is recorded from 2019-06-13 to 2025-03-24, spanning 7 years tracked.

Regulatory Verification Notes

The website appears to operate in a sector where individual services and property transactions may require appropriate professional, environmental, land, or commercial documentation. Its pages describe the services offered but do not present a licensing authority or licence number in the supplied evidence. This is a regulatory-transparency item for independent confirmation, not evidence of a scam. The operator's real-world identity is not independently verified, so the site's apparent legitimacy should not be treated as proof of a particular legal entity. No adverse broker-reputation match was identified.

EVIDENCE

- The About and Services content presents Geoflora as an environmental, land-regularization, and property-commercialisation business focused on Minas Gerais.
- The supplied site analysis records no claimed licence authority and no licence number.
- The site is served from AS398101, GoDaddy.com, LLC, United States.
- Its transport certificate is issued by YE2, uses Domain Validation (DV), and is valid until 2026-10-02 12:02:47 UTC.

What to Verify Next

Before a credential or payment interaction, an enterprise or prospective customer should independently confirm the contracting entity, its authority to provide the relevant environmental or land services, and the documentation supporting any property listing. Payment arrangements should be checked for documented buyer protections, contractual terms, refund or cancellation provisions, and a payment route appropriate to the transaction; official contact channels should also be confirmed through an independent route.

EVIDENCE

- The Services and property-marketplace content identifies the activities for which professional and transaction-level documentation should be requested.
- The site's contact and commercial pages provide the starting point for validating the contracting party and transaction terms.
- The supplied analysis identifies no sensitive form or direct payment mechanism on the captured pages, making independent confirmation of any later transaction workflow appropriate.

Summary Verdict

The available evidence supports a **high-trust, low-risk posture** and is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or other contradictory signal was identified, although the real-world operator connection remains independently unverified.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by GoDaddy.com, LLC, with no CDN or WAF vendor detected in the observed path. This is conventional hosting infrastructure, but it provides limited evidence of additional edge-layer protection beyond the site's valid TLS transport.

Closing Assessment

Ordinary engagement is proportionate to the assessed posture, subject to independent merchant-identity, contractual, and payment-protection checks before credentials or funds are committed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of geofloraconsultoria.com.br.

- The request stayed on geofloraconsultoria.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2028-07-11. CLEAR
- The earliest public archive of this site is from 2019-06-13. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about geofloraconsultoria.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
