

Is geoverde.cl a scam? TrustSniffer's high-risk assessment: 0/100

geoverde.cl

Verdict

0

OUT OF 100

CRITICAL RISK

geoverde.cl shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language website for Geoverde, an environmental consultancy (est. 2017) offering advisory services, monitoring, rehabilitation, flora/fauna and soil studies, with office in Santiago, Chile and multiple regional operation centers. Includes team description, client mention, and contact details (address, phone, email, social links).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://geoverde.cl/>

What geoverde.cl served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Spanish-language corporate site for Geoverde, an environmental consultancy presenting advisory, environmental monitoring, rehabilitation, flora and fauna studies, soil and forestry services, and regional operations in Chile. Its apparent business model is business-to-business environmental consulting for sectors including mining, energy, and civil works.

Scam/Impersonation Risk

The site's visible content is consistent with an environmental consultancy and does not itself present overt deceptive elements, login functionality, or sensitive submission forms. However, this benign page presentation is outweighed by a **confirmed blacklist status** and multiple external malicious detections, including detections associated with Fortinet, Kaspersky, and Sophos. The available evidence does not establish brand impersonation, phishing, or conflicting legal identities, but the external threat signals create a material risk for sensitive interaction and require a security-forward posture.

EVIDENCE

- External reputation telemetry recorded 16 malicious detections among 21 evaluated results, with Fortinet, Kaspersky, and Sophos identified among the flagging vendors.
- The homepage presents environmental consulting services and no login or sensitive form was observed; this page-level appearance does not offset the external blacklist evidence.
- Domain registration record: registered 2018-05-22 (~8.25 years old).
- Archive record: 661 snapshots from 2013-07-07 through 2026-03-03, spanning 14 years; no suspicious repurposing was identified in the historical analysis.

Regulatory Verification Notes

The “Quiénes Somos” and services content identifies Geoverde SpA as an environmental consultancy established in 2017, with a Santiago headquarters and regional operating centers. The site describes environmental permissions and services, including PAS-related work, but does not provide a specific regulatory license or registration number that can be independently assessed from the supplied pages. This is a verification gap rather than proof of unlawful activity. No broker-sector match was identified in the available third-party reputational context, which is not a licensing determination.

EVIDENCE

- The “Quiénes Somos” page states that the company was constituted in 2017 under the name Geoverde SpA and describes its Santiago headquarters and regional operations.
- The services pages describe advisory work, environmental monitoring, flora and fauna studies, soil assessments, and forest-related services, including references to PAS Nos. 148, 149, 150, and 151.
- The site does not state a license number or named licensing authority in the reviewed legal or business disclosures.
- Hosting telemetry: served from AS16276, OVH - OVH SAS, FR.
- Transport telemetry: TLS certificate issued by YR2 using Domain Validation (DV), valid to 2026-11-04.

What to Verify Next

Before any sensitive engagement, an independent party should confirm Geoverde SpA's corporate existence and current operating status through the relevant Chilean public registry, and confirm whether the environmental services being offered require specific sectoral authorizations. The business address, telephone details, and social profiles shown on the site should be validated through an independently sourced channel rather than relying solely on the website. Any security warning or blacklist status associated with the domain should also be resolved by the organization's legitimate technical or administrative contacts before credentials, confidential information, or payments are considered.

EVIDENCE

- “Quiénes Somos” page: use the stated legal name and Santiago location as identifiers for an independent corporate-registry check.
- Services pages: use the referenced environmental permission categories to determine whether sector-specific authorization should be confirmed.
- Contact page: independently validate the published business channels and office details.
- Security review: require documented resolution of the domain’s external threat detections before sensitive interaction.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction at this time**. Although the website presents a coherent corporate-consulting profile and has substantial historical continuity, the confirmed external threat and blacklist signals dominate the assessment. The apparent business identity should therefore be treated as unverified for security-decision purposes.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating control against direct exposure of the underlying service. The observed edge address belongs to AS16276 and is associated with OVH; the origin server was not observable in this analysis. This infrastructure arrangement supports availability and perimeter protection but does not establish legitimacy or neutralize the external reputation findings.

Closing Assessment

Sensitive actions, including credential submission, confidential information exchange, or financial transactions, should be deferred until the domain's threat status and the organization's independent business credentials have been satisfactorily validated.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of geoverde.cl.

- The request stayed on geoverde.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2034-05-22. CLEAR
- The earliest public archive of this site is from 2013-07-07. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about geoverde.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
