

Is germanminer.de legit? TrustSniffer's high-trust assessment: 100/100

germanminer.de

Verdict

100

OUT OF 100

HIGH TRUST

germanminer.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

German-language homepage for GermanMinerDE, a Minecraft RealLife and economy role-playing server reportedly active since 2011. It describes gameplay features and community history, provides the connection address MC.GermanMiner.DE, links to community channels and a shop, and explicitly states that the server is unaffiliated with Mojang AB or Microsoft.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

GermanMinerDE is a German-language community website for an established Minecraft RealLife and economy role-playing server. It presents gameplay features, events, community history, server-connection information, voting and forum access, social channels, and a shop supporting its multiplayer entertainment service.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation signals were observed. The site explicitly distinguishes itself from Mojang AB and Microsoft, while its long domain history, sustained archival continuity, and established traffic footprint strongly support an authentic gaming community rather than a recently created imitation. Observed browser behavior contained no credential-harvesting forms, cloaking, suspicious scripts, wallet activity, or unauthorized external data submission.

- The homepage states that GermanMinerDE is unaffiliated with Mojang AB and Microsoft and identifies the service as a Minecraft community server.
- The domain was registered circa 2013 and is approximately 13.5414 years old.
- The web archive contains 276 snapshots spanning 2013-01-14 to 2026-05-14, representing 14 years of tracked history without detected suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no safe-browsing malicious finding, no abuse reports, and a global traffic rank of 519,946.

Regulatory Verification Notes

The site presents an entertainment and community service, not an investment, brokerage, cryptocurrency, or earnings proposition. No financial-services license is claimed, and the observed business model does not itself establish a corresponding regulatory requirement. The homepage provides legal-policy links, although their contents were not included in the supplied page evidence; this does not undermine the convergent legitimacy indicators.

- The homepage describes a Minecraft role-playing environment based on simulated real life, an in-game economy, community events, and gameplay features.
- The homepage contains no sensitive form or login form and makes no investment, financial-return, token, or cryptocurrency claim.
- The hosting infrastructure is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).
- The site's transport encryption uses a WE1-issued domain-validated certificate, valid until 2026-10-09.

What to Verify Next

Prospective purchasers should review the shop’s current pricing, refund conditions, fulfillment terms, and any age-related requirements before payment. The published server address and official community channels can be cross-checked through the site’s established social presence, while applicable rules should be reviewed before joining gameplay or community spaces.

- The homepage links to a shop but does not display pricing or detailed monetization terms in the supplied content.
- The homepage publishes the connection address MC.GermanMiner.DE.
- The homepage links to Facebook, YouTube, Instagram, Twitter, and Discord community channels.
- The navigation provides access to rules, tutorials, voting, features, and the community forum.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical continuity, clean external reputation, stable behavior, and coherent community purpose converge without contradictory risk signals.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer. All four observed IPv4 and IPv6 addresses were Cloudflare edge addresses, and no origin-server candidate was exposed; this reduces direct infrastructure exposure but is treated as a protective control rather than independent proof of legitimacy.

Closing Assessment

Normal interaction, including account login, community participation, and standard use, is appropriate; ordinary payment due diligence should accompany any shop purchase.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of germanminer.de.

- The request stayed on germanminer.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2013-01-14. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about germanminer.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
