

Is gestion.pe legit? TrustSniffer's high-trust assessment: 90/100

gestion.pe

Verdict

90

OUT OF 100

HIGH TRUST

gestion.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Editorial website focused on economy, finance and business in Peru. Contains news articles, opinion pieces, sponsored content and subscription features; includes privacy/consent banner and ad-related partner lists.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Gestión is an established Peruvian editorial website focused on economy, finance, business, markets, personal finance, and related news, supported by advertising, sponsored content, and paid subscription features.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence contains no phishing, impersonation, malicious-content, or external-warning indicators. The site's substantial editorial content, consistent news-media presentation, established page authority, and strong global traffic footprint support an apparently legitimate publication model. Behavioral testing recorded one hidden form and substantial external request activity, but the visible forms were associated with subscription, login, and consent functions; no sensitive form was directed to an untrusted destination, and no wallet, clipboard, cloaking, or credential-exfiltration behavior was identified. These observations are better explained by advertising, analytics, consent, and subscription infrastructure than by an abuse pattern.

EVIDENCE

- The homepage presents a news-media structure with sections for economy, companies, markets, Peru, technology, personal finance, opinion, podcasts, video, and subscriber content.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing warning; the site's traffic rank was 31256 and it was within the top 1m.
- Behavioral testing recorded 1 hidden form, 47 external XHR requests, and 57 external POST requests; no password was submitted to an external form and no wallet-drainer activity was detected.

Regulatory Verification Notes

The website presents an editorial and subscription business rather than a financial product or investment service. No financial license or registration number was identified in the supplied site content; for this business model, that is a regulatory-scope and disclosure point rather than evidence of a scam. The registration record names NIC.PE as registrar and Empresa Editora El Comercio S.A. as owner, but the available evidence does not independently verify that this entity is the current real-world operator of the website. The overall evidence remains consistent with an established, apparently legitimate publication, while operator identity should not be treated as proven.

EVIDENCE

- The homepage and footer expose “¿quiénes somos?”, terms and conditions, privacy, cookies, frequently asked questions, subscription, and login pages.
- The supplied registration record lists NIC.PE as registrar and Empresa Editora El Comercio S.A. as owner.
- The site is served from AS20940, identified as AKAMAI-ASN1 – Akamai International B.V., NL.
- The transport certificate was issued by YR1 at DV validation level and is valid to 2026-08-31T14:12:35+00:00.

What to Verify Next

Before credential or payment interactions, an independent business check should confirm that the subscription counterparty and payment recipient correspond to the expected publishing entity. The terms, cancellation or refund provisions, privacy disclosures, and payment-protection arrangements should be reviewed through the site's own legal and subscription flows. Contact channels should also be confirmed through an independent route, such as a known corporate directory or an established offline contact.

EVIDENCE

- The terms and conditions, privacy, cookie, and frequently asked questions pages provide the relevant documents for subscription and data-use review.
- The subscription and login functions are exposed as distinct site features, providing a defined flow for checking account and payment terms before proceeding.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion concerns the site’s observed trust and abuse risk; it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This architecture provides a meaningful mitigation against direct exposure of the underlying service, but remains an infrastructure safeguard rather than proof of legitimacy.

Closing Assessment

Normal editorial browsing is proportionate to the evidence; credentials or payments should be preceded by the ordinary independent merchant-identity, cancellation, and payment-protection checks appropriate to a subscription service.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gestion.pe.

- The request stayed on gestion.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by cloudflare.com, across 4 name servers. NOTED
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gestion.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
