

Is getactive365.com a scam? TrustSniffer's high-risk assessment: 0/100

getactive365.com

Verdict

0

OUT OF 100

CRITICAL RISK

getactive365.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple landing/contact page for 'Get Active 365' offering free credits and an AI builder promotion, with an email signup form, cookie consent, and reCAPTCHA. No login or financial transaction UI present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://getactive365.com/>

What getactive365.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Get Active 365 is a small marketing and lead-generation landing site promoting an AI website-building service, offering visitors 50 free credits, access to the Airo AI Builder, email updates, promotions, and a contact form.

Scam/Impersonation Risk

The site presents a relatively simple, non-financial marketing experience, with no login, password, wallet, or payment interface identified on the homepage. However, this benign surface is outweighed by confirmed external threat detections: the domain is blacklisted, and multiple security providers classified it as malicious. Seven abuse reports also concern the resolved IP address; those reports are attributed to shared-provider infrastructure rather than directly to the website operator, but they remain relevant contextual evidence. No brand impersonation or conflicting legal-entity identity was observed in the supplied page content, yet the external detections create a material risk for sensitive interaction.

EVIDENCE

- Homepage text promotes “Get 50 free credits” and “Try Airo AI Builder,” while exposing only an email-signup/contact form and no login or financial transaction interface.
- External reputation checks recorded 10 malicious detections and a confirmed blacklist, with threat detections from Fortinet, Kaspersky, and Sophos.
- The technical reputation record attributes 7 abuse reports to IP address 13.248.243.5, with the subject identified as shared infrastructure rather than the website operator.
- Registration records show the domain was created in 2025 and is approximately 1.26 years old.

Regulatory Verification Notes

The supplied page content identifies the service as “Get Active 365” but does not independently establish the legal entity operating it. No license, registration number, or regulatory authority is disclosed in the available content. The page references Privacy Policy and Terms of Service materials and uses a conventional email-capture form, but the underlying legal disclosures were not supplied for assessment. These omissions are verification gaps rather than standalone proof of fraud; nevertheless, they leave the commercial operator and accountability arrangements unverified. A historical capture record reports 36 snapshots spanning 2015–2026, while the current registration record indicates a 2025 creation date; that provenance discrepancy should not be treated as evidence of continuity for the present operator.

EVIDENCE

- Homepage footer identifies “Copyright © 2025 Get Active 365 - All Rights Reserved” and links to Privacy Policy and Terms of Service.
- The available page content contains no stated license authority or registration number.
- Historical records report 36 snapshots, with coverage from 2015-08-27 through 2025-07-11 and 11 years tracked.
- The registration record lists GoDaddy.com, LLC as registrar and Domains By Proxy, LLC as the registrant organization.

What to Verify Next

Before any signup or other sensitive interaction, an independent corporate-registry search should establish the legal entity behind Get Active 365 and confirm that its contact details correspond to the service. The Terms of Service and Privacy Policy should be obtained and reviewed for operator identity, governing jurisdiction, data-use practices, cancellation terms, and liability provisions. Any proposed subscription or paid upgrade should be validated through independently sourced contact channels and a payment method with strong dispute protections.

EVIDENCE

- The homepage provides one contact/email-signup form and a reCAPTCHA notice, but no independently sourced business address or telephone number is shown in the supplied content.
- The page describes email collection for “updates, promotions, and more.”
- The supplied content presents the service as a marketing and lead-generation offering rather than a regulated financial product.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. Its ordinary-looking marketing presentation does not overcome the confirmed blacklisting and malicious threat detections, and the real-world operator remains unverified. Passive viewing is materially different from relying on the site for credentials, account access, or financial activity.

Infrastructure Integrity

The site is served through Amazon’s CDN/WAF infrastructure, with observed edge addresses 13.248.243.5 and 76.223.105.230 on AS16509; no origin-server candidate was identified. This infrastructure provides a genuine exposure-mitigation benefit, but shared CDN hosting does not establish legitimacy or offset the external threat findings. The site uses a valid domain-validated TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid until 2026-10-09.

Closing Assessment

The appropriate posture is to restrict activity to passive observation and avoid submitting credentials, personal information, or payment details unless the operator and service are independently validated through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of getactive365.com.

- The request stayed on getactive365.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-17. NOTED
- The earliest public archive of this site is from 2015-08-27. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about getactive365.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
