

Is gethost.nl legit? TrustSniffer's high-trust assessment: 100/100

gethost.nl

Verdict

100

OUT OF 100

HIGH TRUST

gethost.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

GetHost presents affordable Dutch web-hosting packages with annual pricing, WordPress and Joomla support, LiteSpeed caching, Imunify360 security, SSL, email, and customer support. The page provides a physical address and Dutch business registration details.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

GetHost is a Dutch web-hosting provider offering recurring hosting packages with annual pricing, domain registration, server services, WordPress and Joomla support, SSL, email, caching, security features, and customer assistance.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent hosting business model, provides clear service descriptions and pricing, and shows no phishing, impersonation, malicious-content, or suspicious behavioral indicators. Its long operating history and clean external reputation further support the conclusion that it is an established service provider.

EVIDENCE

- The homepage describes hosting subscriptions, domain registration, server services, and customer support.
- The domain was registered on 2007-04-17 and is approximately 19.31 years old.
- Archive records contain 257 snapshots spanning 2007–2026, covering 20 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site supplies a physical address and Dutch business-registration details, alongside transparent annual pricing stated to include VAT. No regulated financial-service offering is indicated; the principal verification consideration is confirming the supplied corporate details independently where procurement or contractual requirements demand it. A third-party broker dataset returned no match, which is contextual reputation support rather than a licensing determination.

EVIDENCE

- The homepage displays a physical business address and Dutch registration information.
- The homepage states that prices include 21% VAT and are presented annually.
- The domain registrar is Registrar.eu.
- The site's hosting infrastructure is identified as AS50673, Serverius-as – Serverius Holding B.V., Netherlands.

What to Verify Next

For formal onboarding, independently match the published company details against the relevant Dutch business registry and confirm the contractual entity named on invoices or service agreements. Standard procurement checks should also confirm the applicable service terms, support arrangements, and data-processing commitments.

EVIDENCE

- The homepage contains the business address and registration details used for entity matching.
- The service pages describe the hosting packages, support model, security features, and annual billing basis.
- The site advertises a dedicated contact person and telephone support.

Summary Verdict

GetHost presents as a legitimate, established, and trustworthy commercial hosting provider. The available evidence converges on a stable, professional operating business with no observed contradiction requiring heightened security treatment.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Serverius-as – Serverius Holding B.V. in the Netherlands, without a detected CDN or WAF layer. Transport security uses a DV certificate issued by YR2, valid through 2026-10-18; this supports secure communication but does not independently establish organizational identity.

Closing Assessment

Normal interaction, including account login, account administration, and standard service use, is appropriate, subject to ordinary enterprise procurement and contractual checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gethost.nl.

- The request stayed on gethost.nl. It was not redirected to another domain. CLEAR
- Registration is published under Registrar.eu. CLEAR
- DNS for this domain is served by gethost.nl, across 2 name servers. NOTED
- The earliest public archive of this site is from 2007-04-27. CLEAR
- It is hosted on Serverius-as, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gethost.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
