

Is gfgxcx.com safe? TrustSniffer's low-trust assessment: 25/100

gfgxcx.com

Verdict

25

OUT OF 100

LOW TRUST

gfgxcx.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-24 by automated analysis. Classification confidence 55%.

What this site appears to be

A bare web directory index listing multiple .zip files with timestamps and sizes. No site branding, contact, or explanatory content; potential risk from downloading unvetted archives.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What gfgxcx.com served when TrustSniffer captured it on 2026-09-24. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The site is a bare directory index rather than a conventional branded service: its homepage presents “Index of /” and exposes downloadable ZIP archives, including files named “LocalOffice1.zip” and other opaque filenames, with no visible explanation of ownership, purpose, or monetization.

Scam/Impersonation Risk

The site presents a high-risk interaction profile because its only visible function is direct archive downloading, while the files have no stated provenance or explanation. Independent reputation checks identify a confirmed blacklist result and additional malicious or suspicious detections; these signals materially outweigh the fact that the page did not display a login form, payment form, or overt brand impersonation. No conflicting legal-entity names were observed, but the absence of a recognizable identity does not resolve the external threat indication. The appropriate interpretation is a confirmed reputational contradiction with elevated risk around downloading or executing the listed files.

EVIDENCE

- The homepage is titled “Index of /” and exposes direct ZIP downloads, including “LocalOffice1.zip,” “c.f.g.hf.t.221.zip,” and “d.f.r.qe.114.zip.”
- The homepage contains approximately 156 characters of directory text and provides no file provenance, explanatory business content, branding, or contact route.
- External reputation assessment records a confirmed blacklist result, with 1 malicious and 2 suspicious detections among evaluated results.

Regulatory Verification Notes

The website does not present an identifiable operating entity, licensing statement, registration number, governing terms, or other substantive legal disclosure on the observed homepage. Its business purpose is therefore unclear, and the available evidence does not independently verify the operator’s identity. Ownership opacity is a governance limitation relevant to accountability, while the use of a named registrar is only an administrative fact and does not establish legitimacy. No broker match was identified in the available third-party context, but that absence is not a licensing or regulatory determination.

EVIDENCE

- The homepage contains no visible company name, license claim, registration number, terms, or regulatory disclosure.
- Domain registration telemetry records creation on 2026-09-14, with an age of 0.02 years.
- The domain is registered through Metaregistrar BV; the observed registration expiry is 2027-09-14.

What to Verify Next

Before any interaction beyond passive viewing, an organization should obtain the operator’s legal identity and independently confirm it through authoritative corporate or regulatory records. The provenance and integrity of each archive should be established through a trusted, separate channel, with any downloaded material handled only in an isolated analysis environment and not opened on production systems. Security teams should also compare the domain and file hashes against internal detections before permitting access.

EVIDENCE

- The homepage supplies downloadable ZIP files but no provenance, publisher identity, checksum, or explanatory documentation.
- The homepage has no contact details or independent support channel through which ownership or file origin can be confirmed.
- The observed page is a directory listing with direct-download behavior and no sensitive form or authenticated workflow.

Summary Verdict

The website has a low-trust posture and should be treated as an elevated-risk, unverified destination. The available evidence does not establish a legitimate operating identity, and the confirmed external reputation contradiction makes sensitive interaction or file acquisition inappropriate without independent validation.

Infrastructure Integrity

The site is served through CDN/WAF-protected edge infrastructure associated with DigitalOcean, LLC, in the United States; the observed origin was not independently visible. This protection may reduce direct exposure of the underlying host, but it is only a mitigating infrastructure characteristic and does not offset the site-level reputation and provenance concerns.

EVIDENCE

- Hosted on AS14061 (DigitalOcean, LLC, US).
- The infrastructure record identifies one observed edge IP, 178.128.118.22, with no observable origin candidate.
- TLS uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2027-04-09.

Closing Assessment

Prospective users should limit activity to non-executing observation and require independent operator and file-provenance validation before permitting any further interaction.

Written analysis generated 2026-09-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fgfxcx.com.

- The request stayed on gfgxcx.com. It was not redirected to another domain. CLEAR
- Registration is published under Metaregistrar BV. CLEAR
- DNS for this domain is served by share-dns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-14. NOTED
- The earliest public archive of this site is from 2026-09-14. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gfgxcx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
