

Is giaoducthoidai.vn legit? TrustSniffer's high-trust assessment: 90/100

giaoducthoidai.vn

Verdict

90

OUT OF 100

HIGH TRUST

giaoducthoidai.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Vietnamese online newspaper focusing on education and general news. Contains many articles, contact and licensing information, advertising contacts and sponsored links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Vietnamese online newspaper titled “Báo Giáo dục và Thời đại Online,” presenting extensive reporting across education, politics, society, culture, health, science, and sports, with an apparent editorial business model supported by advertising, sponsored content, and commercial partnerships.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-media identity, substantial editorial content, contact details, and no detected login form, payment workflow, cryptocurrency functionality, phishing indicator, or suspected brand impersonation. Some dynamic behavior involved suspicious inline scripts, substantial external requests, and post-interaction page changes; in context, these are more consistent with advertising and commercial publishing activity than with a confirmed abuse pattern. Two abuse reports relate to the shared service-provider IP rather than specifically to the website, and the associated confidence is low, so this signal does not establish site-level maliciousness.

EVIDENCE

- The homepage is categorized as a news and media publication and contains extensive articles covering education, national affairs, society, culture, health, science, and sport.
- The homepage contains no sensitive form, password-external form, wallet connection, clipboard manipulation, or detected phishing workflow.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections for the domain; the domain is ranked 53039 and is within the top 1 million websites.
- The observed IP address has 2 abuse reports with a confidence score of 8, attributed to shared FPT Telecom infrastructure rather than specifically to the website.

Regulatory Verification Notes

The site appears to operate as an editorial publication rather than a financial or transactional service. Its homepage provides contact and licensing-related information, but the available evidence does not independently verify a licensing authority or registration number. The real-world operator identity is not independently verified, so the legitimacy assessment remains evidence-consistent and apparent rather than proven. No matching broker warning was identified in the supplied third-party context.

EVIDENCE

- The homepage identifies “Báo Giáo dục và Thời đại Online” and publishes editorial material across multiple public-interest subject areas.
- The homepage includes a hotline, an email contact, advertising contacts, sponsored links, and commercial listings.
- Hosted on AS18403, FPT-VN – FPT Telecom Company, VN.
- TLS uses the Sectigo RSA Domain Validation Secure Server CA issuer, with DV validation, valid to 2026-08-26T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the publisher’s legal identity and any licensing or registration references through the relevant Vietnamese registry or an offline institutional contact. Standard checks should also confirm that the intended contact channel belongs to the publication, that any sponsored or commercial offer has clear terms, and that payment protection and dispute mechanisms are available where applicable.

EVIDENCE

- The homepage presents licensing-related information but the available evidence does not independently verify the relevant authority or registration number.
- The homepage identifies a publication name and provides contact details suitable for independent confirmation.
- The site’s business model includes advertising, sponsored content, and commercial partnerships, making separation of editorial and commercial material a relevant verification point.

Summary Verdict

The overall posture is high trust and low risk, with evidence consistent with an established and apparently legitimate news website. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure and common web attacks. The observed address was a CDN edge address, and the origin server was not observable in the supplied infrastructure assessment; this supports infrastructure protection but is not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making any payment, independent checks of the publisher’s identity, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 42.112.59.46 (FPT Telecom, Fixed Line ISP), 8% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of giaoducthoidai.vn.

- The request stayed on giaoducthoidai.vn. It was not redirected to another domain. CLEAR
- It is hosted on FPT-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about giaoducthoidai.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
