Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Japanese multi-vendor gift marketplace that presents priced products from named merchants and brands, organized by occasion, recipient, and category, with offerings spanning personalized merchandise, food, flowers, beauty and household goods, experiences, corporate gifts, and electronic gift certificates.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The homepage's extensive retail catalogue, visible yen pricing, merchant attribution, conventional account functions, and coherent gift-shopping navigation are consistent with its stated commercial purpose. This content alignment converges with a long-established domain, meaningful global usage, clean external reputation, and benign interactive behavior.

- The homepage identifies the service as a Japanese online gift marketplace and displays ordinary retail navigation, ranked products, merchant and brand names, and yen-denominated prices.
- The domain was registered in 2014 and is approximately 12 years old.
- External reputation checks recorded 0 malicious and 0 suspicious detections, while the associated delivery-network address had 0 abuse reports and 0 abuse-confidence score.
- The domain holds a global traffic rank of 63,345 and is within the top one million sites.

Regulatory Verification Notes

The observed business model is ordinary e-commerce rather than a financial, brokerage, or investment service, so the absence of a financial-license claim is not adverse. No conflicting legal-entity names were identified in the supplied page content, and the assessment found no governance-opacity condition. The available material does not establish the contractual identity and jurisdiction-specific terms governing each marketplace purchase; those details are transaction-level consumer disclosures rather than indicators of impersonation.

- The homepage characterizes the service through gift discovery, product sales, merchant listings, corporate ordering, experiences, and electronic gift certificates; it makes no investment or brokerage proposition.
- The homepage contains no cryptocurrency, token, staking, leverage, or wallet-connection functionality.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-09-20.
- The observed homepage contained no sensitive form, hidden form, or form submitting credentials to an untrusted destination.

What to Verify Next

Before purchasing, prospective customers should confirm the named merchant, total price, delivery conditions, return or cancellation policy, and any restrictions attached to personalized items, experiences, or electronic certificates. Official customer-service channels and the contractual seller shown during checkout should be checked through the site’s published help and transaction pages, particularly for corporate or high-value orders.

- The homepage presents goods and services from multiple named merchants, making seller-specific fulfilment and return terms relevant to individual transactions.
- The navigation includes a Help and Contact area intended to support customer enquiries.
- Personalized goods, experience gifts, electronic certificates, and consolidated corporate orders appear as distinct offerings whose fulfilment conditions may differ.
- Interactive testing completed successfully without cloaking, hidden sensitive forms, clipboard manipulation, or suspicious inline scripts.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence between its commercial identity, mature domain presence, substantive marketplace content, clean reputation, and benign observed behavior. Normal interaction, including account login, account activity, and standard purchases, is appropriate.

Infrastructure Integrity

The service is protected by Cloudflare’s CDN/WAF, which reduces direct exposure of the origin server and provides standard edge-layer resilience; this is a mitigating security control rather than standalone proof of legitimacy. All six observed addresses were Cloudflare edge endpoints, with no origin candidate identified.

- The site is served from AS13335 by Cloudflare, Inc., with the observed endpoint geolocated to the United States.
- Six unique Cloudflare edge addresses were observed across IPv4 and IPv6 resolution.
- The site resolved normally through the CDN/WAF infrastructure.

Closing Assessment

Prospective users may engage with the site normally while applying standard e-commerce diligence to merchant terms, payment details, and order confirmation.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of giftmall.co.jp.

- The request stayed on giftmall.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about giftmall.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
