

Is gimaq.com legit? TrustSniffer's high-trust assessment: 100/100

gimaq.com

Verdict

100

OUT OF 100

HIGH TRUST

gimaq.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Company site for GIMAQ industrial S.C. presenting products, services and featured projects in Catalan/Spanish. Contains marketing copy about flexibility, innovation and excellence and a project portfolio; no obvious financial or credential-harvesting flows.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

GIMAQ is a corporate website for an industrial machinery engineering company, presenting the design and manufacture of machinery, process lines, marking and verification systems, engineering services, sector expertise, and a portfolio of completed projects for business customers in food, cosmetics, pharmaceutical, packaging, and plastics industries.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent industrial B2B business model rather than financial services, credential collection, cryptocurrency activity, or other abuse-oriented functionality. The site's content describes specific engineering capabilities and projects, while observed behavior showed no login form, sensitive form, wallet connection, cloaking, or suspicious script activity. Available external reputation checks identified no malicious or suspicious findings, although coverage was partial. The apparent company identity is consistent with the website content, but the real-world operator remains not independently verified.

EVIDENCE

- Homepage content identifies industrial machinery design and fabrication, process lines, marking and verification, and projects serving food, pharmaceutical, packaging, and plastics sectors.
- Homepage behavior showed no login form, hidden form, sensitive form, wallet connection, or suspicious inline script.
- The domain was registered in 2005 and is approximately 20.78 years old.

Regulatory Verification Notes

The website presents itself as GIMAQ industrial S.C. and provides company-oriented information through its corporate pages. No financial or regulatory licence is claimed, which is not inherently anomalous for an industrial machinery and engineering supplier; however, the available material does not independently establish the legal entity operating the domain. The site therefore reads as an apparently legitimate established business, while contracting parties should distinguish that assessment from independently verified operator identity. Registration through Acens Technologies, S.L.U., valid transport encryption, identified hosting, and the absence of observed malicious reputation signals provide supporting infrastructure and legitimacy context.

EVIDENCE

- The corporate pages identify GIMAQ industrial S.C. and describe engineering and manufacturing services rather than regulated financial activity.
- The domain registrar is Acens Technologies, S.L.U.
- The site is served from AS198066, LOADING - Grupo Loading Systems, S.L., ES.
- TLS is issued by YR1 at DV validation level and is valid to 2026-10-20T08:07:50+00:00.

What to Verify Next

Before a commercial engagement, the prospective counterparty should independently reconcile the company details shown on the Nosaltres and Contacte pages with an applicable business registry or established offline contact route. Contracting parties should also confirm the responsible legal entity, written scope of work, warranty and return terms for equipment, invoicing details, and payment protections before committing funds or credentials.

EVIDENCE

- The site provides dedicated Nosaltres and Contacte pages for comparison against independently obtained company information.
- The website's stated business model is based on B2B machinery, engineering, and service engagements, making contract, warranty, and payment documentation the relevant verification materials.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate corporate website and no observed scam, phishing, impersonation, or other contradictory

signals. This conclusion supports normal site interaction in context, while not constituting independent proof of the real-world operator's identity.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, which is a mitigating control that reduces direct exposure of the service infrastructure but is not proof of legitimacy. Resolution also identified CDN edge servers and a potential origin candidate; this is a normal infrastructure consideration rather than an adverse finding.

EVIDENCE

- Observed CDN edge IPs were 13.248.169.48 and 76.223.54.146, both associated with AS16509.
- The hosting infrastructure resolved to one additional potential origin candidate alongside two CDN edge addresses.

Closing Assessment

Ordinary independent checks of merchant identity, contractual terms, and payment protection should be completed before credential or payment interactions, particularly for a material B2B engagement.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gimaq.com.

- The request stayed on gimaq.com. It was not redirected to another domain. CLEAR
- Registration is published under Acens Technologies, S.L.U.. CLEAR
- DNS for this domain is served by controldeservidor.com, across 3 name servers. NOTED
- The registration is paid up to 2026-11-13. NOTED
- The earliest public archive of this site is from 2011-01-28. CLEAR
- It is hosted on LOADING, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gimaq.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
