## Full analysis

### Overview

Giornalone is an Italian news and media portal that aggregates and displays the front pages of national, local, sporting, economic, foreign newspapers and magazines, while supporting a newsletter, a paid subscription, advertising, and consent-based data sharing with third-party partners.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-aggregation service rather than a financial, investment, or account-takeover proposition, and the content analysis found no phishing, impersonation, malicious-code, or credential-capture indicators. The published €2.99-per-month subscription and advertising model are commercially ordinary for this type of media service. Some observed external network activity and non-whitelisted requests are reasonably attributable to the advertising and consent ecosystem described on the site; they were not accompanied by hidden forms, wallet activity, clipboard manipulation, or password submission. Overall, the available evidence is consistent with an established, apparently legitimate website, although its real-world operator identity is not independently verified.

#### EVIDENCE

- The homepage is a substantive news/media portal with front-page listings for national, local, sporting, economic, foreign newspapers and magazines, and no detected phishing or brand-impersonation features.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing finding for the site.
- The domain was registered on 2011-10-20T20:00:22Z and is approximately 14.82 years old.

### Regulatory Verification Notes

The site operates as a media-content aggregator and subscription service, not as a service presenting itself as a regulated financial provider. The available material includes an “Informazioni e Contatti” area, but independent verification of the real-world operator is not established in the supplied evidence. No licensing claim or registration number is presented; for this business model, that is a disclosure and merchant-identity item requiring ordinary verification rather than evidence of a scam. The subscription, advertising, cookie-consent, and data-sharing arrangements also warrant review for clarity regarding billing, cancellation, privacy, and third-party processing. The domain is registered through Aruba s.p.a., while its transport security and hosting telemetry show established mainstream infrastructure.

#### EVIDENCE

- The domain registrar is Aruba s.p.a.; the registration expiration is 2026-09-30T00:00:00Z.
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The TLS certificate uses issuer WE1, validation level DV, and is valid to 2026-09-29T05:29:38+00:00.
- The homepage describes a €2.99/month subscription, advertising partners, and consent-based data sharing; no license number is shown in the supplied page evidence.

#### What to Verify Next

Before payment or credential interactions, the prospective user should independently confirm the legal entity operating the subscription, review the terms governing renewal and cancellation, and confirm the available payment-dispute and refund protections. The privacy and cookie disclosures should be checked to establish which information is shared with advertising partners. Contact details should also be validated through an independent route before resolving billing or account issues.

#### EVIDENCE

- The homepage presents subscription and newsletter calls to action alongside cookie-consent functionality and advertising-partner disclosures.
- The site navigation provides an “Informazioni e Contatti” section for operator and contact information.
- The available identity evidence remains unverified, so the operator name and payment terms should be matched against independent merchant records before a transaction.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, while the connection between the site and a independently verified real-world operator remains unresolved.

#### Infrastructure Integrity

The website is protected by Cloudflare CDN and WAF infrastructure, with observed addresses belonging to CDN edge servers rather than a directly exposed origin. This reduces direct origin exposure and provides a meaningful mitigating control, but protective hosting remains an infrastructure safeguard rather than proof of operator legitimacy.

#### Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or payment information, independent checks of the merchant identity, subscription terms, and payment protections should be completed.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about giornalone.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
