

Is girtreka.com a scam? TrustSniffer's high-risk assessment: 0/100

girtreka.com

Verdict

0

OUT OF 100

CRITICAL RISK

girtreka.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal error/placeholder page instructing to edit content in UI under SETTINGS/WHITELABEL. No forms, links, or commercial claims present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	10 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR

Domain age	3.2 years old Registered history	CLEAR
Web archive	Archived since 2025 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

<https://girtreka.com/>

This page
does not

What girtreka.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal error/placeholder page that tells visitors the page does not exist and instructs an administrator to edit the content under “SETTINGS/WHITELABEL.” It presents no identifiable operator, product, transaction flow, or evident commercial purpose.

Scam/Impersonation Risk

Contradictory threat intelligence is present. The domain is reported as blacklisted, with multiple malicious detections from external security sources; under the available evidence, this is sufficient to support a critical sensitive-interaction risk posture even though the captured page itself contains no login form, payment function, phishing prompt, or visible brand impersonation. The placeholder content also provides no substantive business context that could explain or rebut those external detections. The available evidence does not establish a confirmed phishing or impersonation claim, but the blacklist status and malicious detections warrant treating the domain as unsafe for credentials, account access, or financial activity.

EVIDENCE

- The homepage is titled “Error Page” and states, “This page does not exist! PLEASE EDIT ME IN THE UI UNDER SETTINGS/WHITELABEL.”
- External security evaluation recorded 10 malicious detections, with two tier-one security vendors flagging the domain; blacklist status was true.
- The captured page contained 0 forms, 0 internal links, and 0 external links.

Regulatory Verification Notes

The available content does not identify a legal entity, license, registration number, regulated service, or governing jurisdiction. This is a regulatory disclosure gap rather than a standalone determination of fraud, but it prevents meaningful confirmation of the operator’s legal status or any authorization to conduct regulated activity. A valid domain registration record and transport certificate are administrative and technical signals only; neither independently establishes ownership, legitimacy, or regulatory approval.

EVIDENCE

- The domain was registered on 2023-06-11 and is approximately 3.19 years old; the registrar is Name SRS AB.
- The site is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- The TLS certificate uses DV validation, was issued by YR1, and is valid to 2026-10-30T11:01:43+00:00.

What to Verify Next

Before any sensitive interaction, an independent offline or previously trusted channel should confirm that this domain is an authorized website for the claimed service, if any. Any purported financial or regulated activity should be checked directly against the relevant jurisdictional registry using the independently confirmed legal entity and domain. Until those checks succeed, credentials, wallet access, payment details, and financial transfers should not be submitted.

EVIDENCE

- The captured homepage provides no operator identity or business description against which an authorization claim could be matched.
- The page exposes no forms or transaction controls, so no legitimate interaction workflow could be confirmed.
- Observed browser behavior recorded 2 successful runs, with 0 external requests and 0 wallet-connect executions.

Summary Verdict

The overall posture is critical, with the site unsuitable for sensitive interaction. The available evidence does not support a reliable connection to a verified real-world operator, and the external threat signals outweigh the limited benign technical observations from the captured page.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed address was an edge address rather than an independently visible origin server address. This provides some exposure mitigation and may support operational resilience, but it is not evidence that the operator or website is legitimate; edge-only visibility can also limit independent hosting verification.

Closing Assessment

The domain should be treated as read-only at most, with sensitive actions deferred unless independent identity, authorization, and service legitimacy checks produce satisfactory results.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of girtreka.com.

- The request stayed on girtreka.com. It was not redirected to another domain. CLEAR
- Registration is published under Name SRS AB. CLEAR
- DNS for this domain is served by serveriai.lt, across 4 name servers. NOTED
- The registration is paid up to 2027-06-11. NOTED
- The earliest public archive of this site is from 2025-07-10. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about girtreka.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
