The page as captured

<https://gitanocollection.com/>

What gitanocollection.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at gitanocollection.com presents a homepage, but the available capture does not expose substantive visitor-facing content, legal information, or a clearly identifiable business model. Its purpose and the services it may intend to provide therefore cannot be reliably established from the observed site material.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External reputation evidence includes a confirmed blacklist hit from two sources, with two malicious and one suspicious detection recorded in the evaluated results. This is a material contradiction that outweighs the domain's registration continuity and the presence of valid transport encryption. Runtime inspection also identified six suspicious inline scripts, four non-whitelisted external requests, substantial DOM mutation after interaction, and password-form activity, creating additional concern around changing page behavior and credential-handling exposure. No distinct conflicting legal-entity names or confirmed brand impersonation were identified in the supplied page evidence, but the operator's real-world identity remains unverified.

EVIDENCE

- The evaluated external reputation results record 2 malicious detections, 1 suspicious detection, and confirmed blacklist status for the domain.
- Runtime inspection recorded 6 suspicious inline scripts and 4 non-whitelisted external requests, comprising 2 external XHR requests and 2 external POST requests.
- Interaction testing recorded a maximum DOM difference of 6933 and 4 password forms; no wallet-drainer or clipboard-hijacking activity was observed.
- Domain records show registration on 2018-09-14, with a WHOIS age of 7.93 years and registration through PDR Ltd. d/b/a PublicDomainRegistry.com.

Regulatory Verification Notes

The available capture does not provide a usable legal or identity page from which an operating entity, licensing position, or regulatory authorization can be confirmed. This is a verification gap rather than independent proof of fraud, but it is significant because the site is already subject to corroborated external reputation warnings. The certificate confirms encrypted transport only; it does not validate the operator, business authorization, or claims made by the site. No match was identified in the supplied broker-context dataset.

EVIDENCE

- The captured homepage was blocked from substantive content review despite returning HTTP status 200, and no usable legal, identity, or licensing disclosure was available in the supplied page material.
- The domain's registration record lists the owner as nCloud Solutions and the organization as REDACTED FOR PRIVACY.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-10-30.
- Page-authority assessment placed the domain in the mid band, which is contextual only and does not establish legitimacy or regulatory status.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operating entity against the relevant corporate registry and confirm any claimed financial, investment, payment, or trading authorization directly with the applicable regulator. The domain should also be checked against the relevant blacklist operators for the reason, scope, and current status of the listing. Official support and contact channels should be confirmed through an independent, offline route, and any login or payment workflow should be tested only after those checks are complete.

EVIDENCE

- The supplied analysis records a confirmed blacklist hit from two external sources.
- The operator identity is not independently verified; identity-verification confidence is low.
- The available homepage capture does not provide substantive content for validating business purpose, legal status, or licensing claims.

Summary Verdict

Overall posture is **critical and unsuitable for sensitive interaction**. The available evidence is materially inconsistent with treating the domain as a trusted service, and the site should be regarded as an unverified entity with significant external reputation concerns.

Infrastructure Integrity

The site is served through a CDN/WAF layer, which provides a mitigating control against direct exposure of the underlying service. The observed edge address is 54.36.149.163, hosted on AS16276 by OVH - OVH SAS, France; the origin server was not observable in this analysis. This protection does not offset the confirmed external reputation risk.

Closing Assessment

Activity should be limited to non-sensitive observation until independent identity, authorization, and reputation checks produce satisfactory results; credentials, account access, and financial actions should not be undertaken in the interim.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
 - The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

StatusUNKNOWN

Identity score	50/100
Identity verification confidence	15%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gitanocollection.com.

- The request stayed on gitanocollection.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. [CLEAR](#)
- DNS for this domain is served by hglk.link, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-09-14. [NOTED](#)
- The earliest public archive of this site is from 2015-11-23. [CLEAR](#)
- It is hosted on OVH, from a server in FR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gitanocollection.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
