

Is gizemlivadi.com safe? TrustSniffer's low-trust assessment: 30/100

gizemlivadi.com

Verdict

30

OUT OF 100

LOW TRUST

gizemlivadi.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Turkish hospitality site (Gizemli Vadi) presenting hotel, restaurant, events, activities and contact information. Contains descriptions of facilities, amenities and services; phone and email contact listed.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Gizemli Vadi is a Turkish local-hospitality website presenting a hotel and motel, restaurant services, event and meeting facilities, outdoor activities, picnic areas, and a mini-zoo, with the apparent business model of generating revenue through accommodation, dining, events, and on-site leisure services.

Scam/Impersonation Risk

The principal concern is a **confirmed blacklist** supported by external reputation detections, including two malicious and one suspicious classification. This is materially inconsistent with the otherwise ordinary hospitality presentation and creates elevated risk for sensitive interaction, even though the reviewed homepage shows no login form, wallet connection, hidden form, or apparent phishing mechanism. The site's identity remains unverified. Historical evidence indicates continuity associated with the domain, but that history does not independently establish that the current operator is the same entity represented in earlier records.

EVIDENCE

- The homepage presents hotel, restaurant, events, nature activities, and animal-related facilities without visible login, payment, or credential-collection forms.
- External reputation assessment recorded 2 malicious detections, 1 suspicious detection, and a confirmed blacklist.
- Registration records show the domain was created on 2014-06-11 and is approximately 12.2 years old.
- Archive records contain 143 snapshots spanning 2006–2025, covering 20 years of tracked history.

Regulatory Verification Notes

The public content describes a commercial hospitality operation, but it does not establish an independently verified legal operator or regulated status. No license claim or license number is identified in the supplied site material; for this business type, that is a transparency and verification point rather than standalone evidence of fraud. The registration record identifies ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi as registrar. The site's valid transport encryption and established registration history are positive technical indicators, but they cannot offset the external reputation contradiction or prove operator identity.

EVIDENCE

- The homepage and business-information pages describe accommodation, restaurant, event, and recreational services but provide no independently verified legal-entity or licensing record in the supplied content.
- The domain registrar is ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi.
- The site is served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate is issued by WE1, uses Domain Validation (DV), and is valid to 2026-10-19.

What to Verify Next

Before any booking, payment, or submission of personal information, the operator should be confirmed through an independently obtained business or municipal record rather than relying solely on the website. Booking terms, cancellation conditions, refund arrangements, and the recipient of any payment should be checked through an independently verified channel. Contact details should also be confirmed through an offline or separately sourced route, and any payment should use a method offering meaningful dispute protection.

EVIDENCE

- The contact page supplies phone and email contact channels that can be independently cross-checked.
- The Motel and Restaurant sections describe services that should be matched against independently sourced business information before a transaction.
- The site contains no sensitive form or login workflow in the reviewed capture, so transactional arrangements should be assessed separately rather than inferred from the page presentation.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a plausible local-business presentation and substantial technical continuity indicators, but those positives are outweighed by

confirmed external reputation contradictions and the absence of independently verified operator identity. Normal browsing is distinguishable from actions involving credentials, payments, or sensitive personal information.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than a directly exposed origin. This reduces direct exposure of the underlying service and is a mitigating security control, but it is not evidence that the website or its operator is legitimate.

Closing Assessment

Pending independent confirmation of the business and transaction arrangements, interaction should remain limited to passive review; credentials, payments, and other sensitive submissions should not be made through the site.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gizemlivadi.com.

- The request stayed on gizemlivadi.com. It was not redirected to another domain. CLEAR
- Registration is published under ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-11. NOTED
- The earliest public archive of this site is from 2006-12-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gizemlivadi.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
