

Is glamourmagazine.co.uk safe? TrustSniffer's moderate-trust assessment: 70/100

glamourmagazine.co.uk

Verdict

70

OUT OF 100

MODERATE TRUST

glamourmagazine.co.uk is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Dynamic Interaction Caution

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Privacy and cookie/consent information for a consumer publisher site describing purposes, toggles, and a long vendor list used for advertising and audience measurement.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What glamourmagazine.co.uk served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Safe for Read-Only.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Glamour UK is a consumer media and publishing website focused on beauty, fashion, trends, and empowerment, presented as an advertising-supported informational service that uses audience measurement, targeted advertising, and partner-vendor data sharing to fund its content.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity contradictions were observed. The privacy and consent page presents coherent publisher content, contains no login or payment form, and shows no crypto or wallet-related functionality. Two suspicious inline scripts and some non-whitelisted external network activity were observed during interaction testing; these are technical anomalies requiring context, but they do not establish impersonation or a scam, particularly because the page's stated advertising and consent-management model naturally involves external vendors.

EVIDENCE

- The privacy and consent page contains no sensitive form, login form, hidden form, or untrusted form destination.
- The privacy and consent page records two suspicious inline scripts and two non-whitelisted external XMLHttpRequests during behavioral testing.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist hit.

Regulatory Verification Notes

The available page is a privacy, cookie, and consent notice rather than a corporate or regulatory disclosure page. It describes audience measurement, advertising purposes, consent and legitimate-interest choices, and a substantial vendor list, but the available evidence does not independently verify the real-world operator identity or establish regulated-entity status. This is a transparency and identity-verification limitation rather than evidence of fraudulent conduct. The site's advertising-supported publishing model does not itself indicate that a financial-services licence should apply; any engagement involving commercial transactions would nevertheless warrant confirmation of the responsible legal entity and applicable consumer terms.

EVIDENCE

- The privacy and consent page identifies the service as "Glamour UK" and describes processing for content delivery, advertising, audience measurement, and vendor sharing.
- The site's hosting infrastructure is AS16509, Amazon.com, Inc., US.
- The transport certificate is issued by Amazon RSA 2048 M04, uses Domain Validation (DV), and is valid through 2027-02-24.
- The available third-party broker dataset contains no match for the site.

What to Verify Next

Before any sensitive or high-value interaction, independently confirm the responsible publisher or corporate entity through an authoritative business source and ensure that the applicable privacy, advertising, and consumer terms correspond to that entity. Confirm official contact channels through an independent route, review consent settings before accepting optional advertising purposes, and use payment protections appropriate to the transaction if the site redirects to a commercial partner.

EVIDENCE

- The available identity-verification status is unverified.
- The privacy page provides purpose-level consent and legitimate-interest controls, including audience measurement and vendor processing.
- The site is assessed as informational, with no direct consumer-payment model identified in the available page content.

Summary Verdict

The site presents a **moderate-trust, apparently legitimate informational profile** with no observed scam or impersonation contradictions. Its principal limitation is that the available evidence supports the site’s publishing function more strongly than it independently establishes the real-world operator behind it. Normal reading and routine informational use are proportionate, while sensitive or high-value engagement should remain subject to independent business-identity checks.

Infrastructure Integrity

The site benefits from CDN/WAF edge protection, with all observed addresses belonging to edge servers and no origin candidate identified in the analysis. This reduces direct exposure of the underlying hosting environment and is a mitigating technical control, but it is not proof of operator legitimacy.

Closing Assessment

Routine informational use is reasonable; independent confirmation of the responsible entity and transaction counterparties should precede sensitive or high-value actions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by behaviour in a sandbox.

01 Dynamic Interaction Caution

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of glamourmagazine.co.uk.

- The request stayed on glamourmagazine.co.uk. It was not redirected to another domain. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about glamourmagazine.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
