

Is globalfast.se legit? TrustSniffer's high-trust assessment: 95/100

globalfast.se

Verdict

95

OUT OF 100

HIGH TRUST

globalfast.se appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Swedish-language local services blog about construction trades (electricians, plumbers, roofing, etc.). Contains article listings and local service guidance; appears to be a directory/informational site likely monetized via leads/ads.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

What this website is

globalfast.se is a Swedish-language informational blog and local-services directory covering construction trades such as electricians, plumbing, roofing, and related home-improvement topics. Its apparent business model is to attract visitors through service guidance and article listings, then monetize through advertising, referrals, or lead generation for local tradespeople rather than direct e-commerce.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-services publishing model, with no login form, payment workflow, cryptocurrency functionality, hidden sensitive forms, or detected brand-impersonation indicators. External security checks recorded no malicious or suspicious detections, and the site's historical record does not indicate suspicious repurposing or material semantic drift. The available evidence therefore supports an apparently legitimate, low-risk content site, while not independently proving the real-world identity of its operator.

EVIDENCE

- The homepage identifies the site as “Byggarbetare” and presents article categories for VVS, electricians, windows, roofing, and other construction services.
- Historical records show 41 archive snapshots from 2008 through 2026, spanning 19 tracked years, with no suspicious repurpose finding.
- The site's transport and browser behavior showed no login form, hidden sensitive form, external password form, wallet activity, clipboard manipulation, or cloaking.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports.

Regulatory Verification Notes

The site's content is consistent with an informational directory and referral platform rather than a regulated financial or investment service. No licensing claim or license number is presented in the reviewed site content; for this business model, that is a transparency item to clarify rather than evidence of deceptive activity. The operator's real-world identity is not independently verified by the available evidence, so the site's apparent legitimacy should not be treated as proof of a particular legal entity. No relevant third-party broker match was recorded.

EVIDENCE

- The homepage and article listings describe local home-services guidance and referrals, with no regulated financial product or investment-service claim.
- The domain registration record lists 1 Api GmbH as registrar, with creation date 2022-07-21 and expiration date 2027-07-21; recorded domain age is 4.09 years.
- Hosting is provided through AS42708, GLESYS - Glesys AB, SE.
- The site's TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-09-25.

What to Verify Next

Before any credential or payment interaction associated with a referred tradesperson, independently confirm the legal identity of that provider, the scope of the requested work, applicable consumer or return terms, and the availability of payment protection. Any claimed business relationship or official contact route should be confirmed through an independently sourced channel rather than relying solely on information reached through the directory. If a regulated activity is later offered, confirm the relevant authorization directly with the applicable national registry.

EVIDENCE

- The homepage contains no sensitive forms and no direct e-commerce checkout, indicating that commercial interactions may occur through referred service providers rather than on the site itself.
- The site contains six identified internal navigation paths and one external destination, supporting a content-led referral structure.
- The reviewed page has no displayed meta description, canonical declaration, or structured-data markup, so provider information should be checked from independent sources when material decisions are involved.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or other contradictory signals were identified. The classification supports ordinary informational use, but it does not independently establish the operator's legal identity.

Infrastructure Integrity

The site resolves directly to a single hosting address on Glesys infrastructure, without a detected CDN or WAF edge layer. This is a straightforward hosting arrangement rather than a concealment finding; it provides fewer intermediary protections than a CDN-backed deployment but does not, on its own, indicate malicious activity.

EVIDENCE

- The hosting infrastructure resolves to 193.234.21.106 in Sweden.
- The infrastructure record identifies one unique IP, zero edge IPs, and one likely origin IP.
- The hosting network is AS42708, GLESYS - Glesys AB, SE.

Closing Assessment

Routine browsing and use of the site's informational content are proportionate to the assessed posture. For any resulting credential, payment, or service engagement, ordinary independent checks of the counterparty, contractual terms, and payment protections should precede commitment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of globalfast.se.

- The request stayed on globalfast.se. It was not redirected to another domain. CLEAR
- Registration is published under 1 Api GmbH. CLEAR
- DNS for this domain is served by 125.191, across 2 name servers. NOTED
- The registration is paid up to 2027-07-21. NOTED
- The earliest public archive of this site is from 2008-05-06. CLEAR
- It is hosted on GLESYS, from a server in SE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about globalfast.se at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
