

Is globalfieldpremiums.com a scam? TrustSniffer's high-risk assessment: 0/100

globalfieldpremiums.com

Verdict

0

OUT OF 100

CRITICAL RISK

globalfieldpremiums.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

E-commerce site for ordering promotional merchandise (SWAG) with standard navigation, contact info, shipping & returns, and an account sign-in form requesting email and password.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://globalfieldpremiums.com/>

What globalfieldpremiums.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an online storefront for branded promotional merchandise, presenting a “SWAG” shop where visitors can browse materials, review shipping and returns information, contact support, and create an account to place product orders.

Scam/Impersonation Risk

A confirmed blacklist finding and multiple external malicious detections create a material risk that the domain may expose visitors to harmful or deceptive activity, despite the storefront itself appearing visually typical and containing no explicit brand-impersonation indicators in the supplied page content. The homepage includes an email-and-password sign-in function, while behavioral testing detected hidden forms in both observed runs; this combination makes credential submission an inappropriate sensitive interaction. No separate legal-entity identity contradiction or explicit phishing presentation was identified in the page content, but those absences do not offset the confirmed external threat signal.

EVIDENCE

- External threat intelligence recorded 13 malicious detections, with Fortinet and Kaspersky among the flagged vendors; the domain was also recorded by external blacklist sources.
- The homepage presents an account sign-in form requesting an email address and password.
- Behavioral testing detected hidden forms in 2 runs, with a maximum post-interaction DOM difference of 367.
- Domain registration: 2022-07-14T17:37:17Z; age 4.1 years. Archived records are dated 2023-10-30T12:21:21Z through 2026-02-21T19:19:48Z, covering 4 years.

Regulatory Verification Notes

The site presents itself as a merchandise retailer rather than a regulated financial service, so the principal regulatory issue is identity and commercial disclosure rather than a demonstrated licensing breach. The supplied pages do not state a licensing authority or license number, and the available identity verification is unverified; the operator should therefore not be treated as independently established on the basis of the site's own presentation. A valid transport certificate and conventional BigCommerce hosting are technical characteristics only and do not establish ownership, authorization, or regulatory standing.

EVIDENCE

- No license claim, licensing authority, or license number is recorded in the site's business-model and disclosure analysis.
- The site is hosted by BIGCOMMERCE - Bigcommerce Inc., US, on AS399566.
- The TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-15T07:03:27+00:00.
- The site's visible title is the generic phrase "Welcome to our SWAG Site," with no recorded structured business metadata or meta description.

What to Verify Next

Before any account creation, purchase, or organizational engagement, an independent party should confirm the legal operator, business registration, applicable consumer-protection obligations, and any claimed authorization through authoritative registries and independently sourced contact channels. Payment should only be considered where transaction protections, refund terms, and dispute rights can be confirmed independently; credentials used elsewhere should not be reused.

EVIDENCE

- Confirm the operator's legal identity and any applicable registration through the relevant official registry before proceeding.
- Independently validate the published support and contact channels using a trusted offline or pre-existing organizational route.
- Confirm payment-protection, cancellation, delivery, and refund arrangements before authorizing a transaction.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for treating the site as a trusted destination for sensitive interaction. The apparent ordinary-commerce presentation is outweighed by the confirmed external threat findings and unresolved independent identity verification.

Infrastructure Integrity

The site resolves to one likely origin address, with no CDN detected and no edge-IP layer identified. Its hosting environment is a conventional commercial platform, but that infrastructure provides no sufficient mitigation against the application and reputation concerns described above.

Closing Assessment

Account access, credential submission, and transactions should be withheld unless independent operator and threat-status checks produce satisfactory results through trusted channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, page content, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- The page contained a form a visitor cannot see.

Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS
- The page asks visitors for sensitive information.

Page content rule:PAGE_FORM_SENSITIVE
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of globalfieldpremiums.com.

- The request stayed on globalfieldpremiums.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by bigcommerce.com, across 3 name servers. NOTED
- The registration is paid up to 2028-07-14. CLEAR
- The earliest public archive of this site is from 2023-10-30. CLEAR
- It is hosted on BIGCOMMERCE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about globalfieldpremiums.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
