

Is globalprotectionsa.com safe? TrustSniffer's low-trust assessment: 40/100

globalprotectionsa.com

Verdict

40

OUT OF 100

LOW TRUST

globalprotectionsa.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Global Protection offering integrated security systems and services for industrial, commercial and residential clients; includes contact phone/email, services list, projects and client references.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://globalprotectionsa.com/>

What globalprotectionsa.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Global Protection is a Spanish-language corporate website presenting integrated physical-security services for industrial, commercial, and residential customers, including fire detection and suppression, electrical systems, access control, CCTV, and industrial or commercial climate-control installations; its apparent business model is project contracting, maintenance agreements, and equipment sales.

Scam/Impersonation Risk

A confirmed external blacklist hit creates a material contradiction to the site's otherwise professional corporate presentation. The homepage describes a conventional physical-security company, displays project and client-reference content, and does not present a login, cryptocurrency, investment, or payment solicitation; however, behavioral inspection identified four suspicious inline scripts and a suspicious-network classification. These technical and reputational signals warrant a security-forward posture even though no direct brand impersonation, phishing form, or hidden sensitive form was observed. No suspicious contact-email anomaly was identified. The website should therefore be treated as unsuitable for credential submission or financial interaction unless the operator and the blacklist issue are independently resolved.

EVIDENCE

- The homepage presents Global Protection as a provider of fire systems, electrical systems, access control, CCTV, and HVAC services, with projects and client references.
- Behavioral inspection of the homepage recorded 4 suspicious inline scripts, 0 hidden forms, 0 password-external forms, and 0 wallet-drainer runs.
- External reputation telemetry records `external\_blacklist: true`, with 1 malicious and 2 suspicious detections among 3 evaluated detections.

Regulatory Verification Notes

The site communicates a plausible physical-security business model, but the available pages do not independently verify the real-world operator behind the Global Protection presentation. No license claim, licensing authority, or license number is provided in the supplied business information, so the regulatory position and any sector-specific authorizations remain unclear. This is a verification and disclosure gap rather than, by itself, proof of fraud. The absence of a matching broker record provides no positive regulatory conclusion, and the confirmed external blacklist remains the controlling reputational concern.

EVIDENCE

- WHOIS records show registration on 2017-10-17, with an age of 8.84 years, through HOSTINGER operations, UAB.
- Hosting resolves to AS47583, identified as AS-HOSTINGER - Hostinger International Limited, CY, with the server located in DE.
- The site's transport certificate is DV-validated, issued by YR2, and valid until 2026-10-10T01:18:49+00:00.
- The homepage and contact-oriented content identify services and a quotation pathway but provide no license authority or license number.

What to Verify Next

Before any sensitive engagement, the prospective counterparty should confirm that the legal entity operating the site exists in the relevant corporate registry and that the named business has authority to provide the specific security-installation services advertised. The external blacklist result should be investigated with the relevant security or domain-reputation authority, including the reason for listing and the date of the underlying detection. Client references and project claims should be validated through independently obtained contact details rather than relying solely on the website.

EVIDENCE

- The “Nosotros” and “La Empresa” content describes professional capability and innovation but does not independently establish the operator’s legal identity.
- The “Proyectos” and client-reference sections name Industrial Molinera, Novacero, Hospital Guasmo Sur, Negocios Industriales REAL, and Grupo Bimbo as project or client references.
- The contact page offers quotation-oriented contact details, making independent confirmation of the counterparty and service authorization the relevant next step.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's coherent corporate content does not overcome the confirmed external reputation contradiction, and the operator's real-world identity remains unverified. Interaction should be limited to non-sensitive review pending independent resolution of the reputational and identity concerns.

Infrastructure Integrity

The site is hosted directly through Hostinger infrastructure rather than behind a detected CDN, with one resolved IP and a likely origin address. This provides ordinary hosting and transport availability but no meaningful protective separation between an edge service and the origin; infrastructure characteristics should therefore be treated only as technical context, not as evidence of legitimacy.

EVIDENCE

- Infrastructure telemetry reports 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN was detected in the resolved hosting path; the infrastructure provider is AS-HOSTINGER - Hostinger International Limited, CY.

Closing Assessment

A prospective user should avoid login, credential submission, and financial transactions with the site until independent corporate, service, and reputation checks have been completed; non-sensitive, read-only review is the proportionate interim posture.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Analysis engine signal:direct_threat

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of globalprotectionsa.com.

- The request stayed on globalprotectionsa.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by main-hosting.eu, across 2 name servers. NOTED
- The registration is paid up to 2026-10-17. NOTED
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about globalprotectionsa.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
